Critical Social Theory and the End of Work Edward Granter 2016-04-22 Critical Social Theory and the End of Work examines the development and sociological significance of the idea that work is being eliminated through the use of advanced production technology. Granter's engagement with the work of key American and European figures such as Marx, Marcuse, Gorz, Habermas and Negri, focuses his arguments for the abolition of labour as a response to the current socio-historical changes affecting our work ethic and consumer ideology. By combining history of ideas with social theory, this book considers how the 'end of work' thesis has developed and has been critically implemented in the analysis of modern society. This book will appeal to scholars of sociology, history of ideas, social and cultural theory as well as those working in the fields of critical management and sociology of work.

Applications For Enrollment of Choctaw Newborn Act of 1905 Volume XIV Jeff Bowen 2020-09-24 The Applications for Enrollment of Choctaw Newborn, Act of 1905, National Archive film M-1301, Rolls 50-57, are found under the heading of Applications for Enrollment of the Commission to the Five Civilized Tribes. These applications contain considerably more information than stated on the census cards found in series M-1186. Series M-1301 possesses its own numerical sequence, separate from M-1186. To find each party's roll number researchers must reference M-1186. The governing 1905 statute (H.R. 17474) defined Choctaw Newborn as "infant children born prior to September twenty-fifth, nineteen hundred and two, and who were living on said date, to citizens by blood of the Choctaw . . ." It also authorized the Department of the Interior to enroll and make allotments to such children based on applications received on their behalf no later than May 2, 1905. The Choctaw--as well as the Chickasaw allotments--were likely some of the most sought after properties in Indian Territory. There was supposed to be a 25-year restriction on the sale or lease of any Indian lands so as to ensure that the owners wouldn't be swindled; however, the presence of huge asphalt and coal deposits in both the Choctaw and Chickasaw Districts elicited pressure from private interests to purchase the lands. On April 26, 1906, President Roosevelt signed the Five Tribes Bill removing some of the restrictions from the sale of all inherited land but continuing to prohibit full-bloods from selling their land for 25 years. Mr. Bowen's faithful transcriptions of the Choctaw applications provide the names of the applicants and their relatives, as well as the identities of doctors, lawyers, midwives, and others.

Rene, el Tigre, & Me Norm Leventhal 2018-02-08 Rene, el Tigre, & Me By: Norm Leventhal After 50 years of private practice in the field of communications law, Norm Leventhal has decided to write the story of how he was fortunate enough to meet the two principal forces in the birth, growth, and maturity of Spanish language television in America and how his law career became thoroughly intertwined with these two giants of Spanish media for more than four decades. It is a story of the development of Spanish language television in the United States – its modest beginnings, the sacrifices made by its pioneers, its growth over the last five decades, and what it took – in financial, business, artistic, and legal talent – to achieve this newfound success. It is also, more importantly, a story of the lessons that the author learned, or should have learned, in his role as counsel to the major players in this achievement. It recounts the highpoints of that effort, as well as the failure in temperament and character that played a part in the mistakes and missteps in judgment that were made in the course of those labors. There are many twists, turns, and unexpected events. Read the entirety of this book and learn something new.

Warm Beer, Lousy Food S. Columbia John S. Columbia 2009-12 The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

One Good Turn Witold Rybczynski 2013-07-23 The Best Tool of the Millennium The seeds of Rybczynski's elegant and illuminating new book were sown by The New York Times, whose editors asked him to write an essay identifying "the best tool of the millennium." The award-winning author of *Home*, *A Clearing in the Distance*, and *Now I Sit Me Down*, Rybczynski once built a house using only hand tools. His intimate knowledge of the toolbox -- both its contents and its history -- serves him beautifully on his quest. One Good Turn is a story starring Archimedes, who invented the water screw and introduced the helix, and Leonardo, who sketched a machine for carving wood screws. It is a story of mechanical discovery and genius that takes readers from ancient Greece to car design in the age of American industry. Rybczynski writes an ode to the screw, without which there would be no telescope, no microscope -- in short, no enlightenment science. One of our finest cultural and architectural historians, Rybczynski renders a graceful, original, and engaging portrait of the tool that changed the course of civilization.
