The New How [Paperback] Nilofer Merchant 2014-04-15 What people are saying about The New How "How are you going to get rid of your Air Sandvich if you don't even know what it is? Provocative and practical at the same time." --Seth Godin, author of Linchpin "The New How is informative and provides exciting insights because the suggestions are practical and doable. Merchant gets the new reality--leadership fails not so much from flawed strategy as it does from failed processes of engagement from those responsible for implementing the strategy. In high-performing organizations, everyone acts like a leader, and they own the strategy and take actions to ensure its success. If you care about making a difference, read this book." --Barry Posner, author of The Leadership Challenge "Collaboration is a powerful, competitive weapon: this book shows you how to use it to win markets." --Mark Interrante, VP Content Products, Yahoo, Inc. "In a world in which the pace of change is ever quickening, collaboration, not control, is the route to a successful organization. This book tells you how to make your organization collaborative. And Nilofer Merchant's writing is a model of clarity." --Barry Schwartz, author of The Paradox of Choice: Why More Is Less "Want to transform your organization into a collaborative enterprise? Nilofer Merchant provides insightful and practical strategies in The New How." --Padmasree Warrior, CTO, Cisco Systems, Inc. "Merchant's book is a practical guide for the journey from strategy to implementation. The collaborative tools described here can help companies reach strategic success--and avoid pitfalls along the way." --Tom Kelley, General Manager, IDEO, and author of Ten Faces of Innovation Once in a generation, a book comes along that transforms the business landscape. For today's business leaders, The New How redefines the way companies create strategies and win new markets. Management gurus have always said "people matter." But those same gurus still relegate strategy to an elite set of executives who focus on frameworks, long presentations, and hierarchical approaches. Business strategy typically has been planned by corporate chiefs in annual meetings, and then dictated to managers to carry out. The New How turns that notion on its head. After many years of working with Apple, Adobe, HP, and many other companies, Nilofer Merchant discovered the secret sauce: the best way to create a winning strategy is to include employees at all levels, helping to create strategy they not only believe in, but are also equipped to implement. In The New How, Nilofer shows today's corporate directors, executives, and managers how they can transform their traditional, top-down approach to strategy planning and execution into collaborative "stratection!" that has proven to be significantly more effective. Enhance performance and outcomes by deflating the "air sandwich" between executives in the boardroom and employees Recognize that strategy and execution are thoroughly intertwined Understand how successful strategy is founded in effective idea selection-a pile of good ideas doesn't necessarily build good strategy Create company strategy and link it to targeted execution, using the practical models and techniques provided

Leadership Alchemy Peter Shields 2018-12-01 Great leadership is hard to find. Companies spend millions trying to fix their leadership issues by recruiting new leaders, hiring consultants to tell them how to restructure and a myriad of other 'outside-in' initiatives that fail to achieve the intended results. What if they're approaching the leadership dilemma entirely the wrong way? 82-year-old Ben Luckeridge is wise enough to know his business needs an inside-out leadership solution. Despite having all that a billion-dollar company and a successful career affords, Ben has serious health problems, regrets and an estranged daughter with whom he longs to reconnect. He must choose an heir to the Luckeridge Group of Companies before it's too late. Ben's nephew Jack, the heir apparent, is barely clinging to his role as CEO of The Luckeridge Group, thanks to his autocratic and arrogant leadership style. How could Ben possibly bequeath the business to him? With the help of his confidant Angela, a transformational executive coach, Ben devises a 12-month leadership adventure which Jack must successfully navigate if he is to become heir. Jack is soon joined on the challenge by a host of would-be challengers, including the engaging and energetic Zenobia, and he is immediately drawn to her calm confidence. While Zenobia is fighting emotional battles of her own, her patience, empathy and leadership potency shine through, showing Jack that to unlock his inherent leadership potential he must overcome his emotional reactivity. As Ben hurtles closer to death, Jack and Zenobia navigate their way toward a business that is more profitable, more meaningful and more sustainable than ever before. Their quest uncovers startling truths that transform all of them – and the organisation – forever.

Handbook of Biophotonics Jürgen Popp 2011-11-30 This debut edition of Visualizing Physical Geography encompasses the science of physical geography from local to global scales, using a uniquely visual approach to take students on a journey from the top layers of the Earth's atmosphere to the rocks underlying the ocean basins to the forests of the farthest continents. As students explore the critical topics of physical geography, their study of the climate, surface features, and habitats around the world uses basic concepts of ecology, geology, chemistry, environmental science, biology, and physics and many other disciplines. Visualizing Physical Geography reinforces these interacting components and, with its premier art program, vividly illustrates the interconnectedness of physical processes that weave together to create our planet's dynamic surface and atmosphere. Visualizing Geography relies heavily on other visuals with text to elucidate concepts for students and solidify their understanding of them. The goal is to help students understand the world around them and interpret what they see in a meaningful, accurate and exciting way. The content, design and layout of the text takes advantage of the full capacity in which students process information – visual as well as verbal. Visualizing Geography also helps students examine their own personal studying and learning styles with several new pedagogical aids -- encouraging students to apply what they are learning to their everyday lives. Visualizing Geography continues to offer ongoing study tips and psychological techniques for mastering the material. Most importantly students are provided with numerous opportunities to immediately access their understanding.

Leadership BS Jeffrey Pfeffer 2015-09-15 Finalist for the 2015 Financial Times and McKinsey Business Book of the Year Best business book of the week from Inc.com The author of Power, Stanford business school professor, and a leading management thinker offers a hard-hitting dissection of the leadership industry and ways to make workplaces and careers work better. In Leadership BS, Jeffrey Pfeffer shines a bright light on the leadership industry, showing why it's failing and how it might be remade. He sets the record straight on the oft-made prescriptions for leaders to be honest, authentic, and modest, tell the truth, build trust, and take care of others. By calling BS on so many of the stories and myths of leadership, he gives people a more scientific look at the evidence and better information to guide their careers. Rooted in social science, and will practical examples and advice for improving management, Leadership BS encourages readers to accept the truth and then use facts to change themselves and the world for the better.

The Big Book of Small Business Tom Gegax 2009-10-13 Your shoes are charred from stomping out brush fires. You have nightmares about UFOs—Unreachable Financial Objectives. All-star interviewees turn into duds. Meetings cause more problems than they solve. The office is a ghost town at 5:01 p.m. Does this sound familiar? Tom Gegax knows what that is like. Years after running his Tires Plus franchise by the seat of his pants, blissfully unaware of how little he knew about getting the most out of people and managing a world-class organization, Tom was faced with a cancer diagnosis and a business at the brink of disaster. Resolved to change things around, he improved his mental clarity, health, and relationships and noticed that the more he profited on a personal level, the more his company profited. Tires Plus grew into a \$200 million business with 150 upscale locations. He had learned the first lesson in Enlightened Leadership 101: Focus on the well-being of your employees and customers—as well as your own—and success will follow naturally. In The Big Book of Small Business, Tom shares his hard-earned lessons on how to become an enlightened, effective leader, and on how to do the small things right so the big decisions work. This all-in-one toolbox for small businesses is jammed with warm-hearted, tough-minded practices and street-smart tips, covering every aspect of a growing business: Starting, funding, and getting your new business off the ground Crafting a mission and growing a corporate culture that works Hiring the best people and maximizing their potential Communicating and negotiating with your employees, customers, and suppliers Creating processes for continuous innovation and growth Protecting your business from unforeseen dangers Planning for growth And much more . . . As thorough as a textbook and as lively as a news magazine, The Big Book of Small Business is the most comprehensive and practical book on how to take a small business to the next level, and an indispensable slingshot for the millions of scrappy Davids taking on corporate Goliaths.

Race and Entrepreneurial Success Robert W. Fairlie 2010-08-13 A comprehensive analysis of racial disparities and the determinants of entrepreneurial performance—in particular, why Asian-owned businesses on average perform relatively well and why black-owned businesses typically do not. Thirteen million people in the United States—roughly one in ten workers—own a business. And yet rates of business ownership among African Americans are much lower and have been so throughout the twentieth century. In addition, and perhaps more importantly, businesses owned by African Americans tend to have lower sales, fewer employees and smaller payrolls, lower profits, and higher closure rates. In contrast, Asian American-owned businesses tend to be more successful. In *Race and Entrepreneurial Success*, minority entrepreneurship authorities Robert Fairlie and Alicia Robb examine racial disparities in business performance. Drawing on the rarely used, restricted-access Characteristics of Business Owners (CBO) dataset compiled by the U.S. Census Bureau, Fairlie and Robb examine in particular why Asian-owned firms perform well in comparison to white-owned businesses and black-owned firms typically do not. They also explore the broader question of why some entrepreneurs are successful and others are not. After providing new comprehensive estimates of recent trends in minority business ownership and performance, the authors examine the importance of human capital, financial capital, and family business background in successful business ownership. They find that a high level of startup capital is the most important factor contributing to the success of Asian-owned businesses, and that the lack of startup money for black businesses (attributable to the fact that nearly half of all black families have less than \$6,000 in total wealth) contributes to their relative lack of success. In addition, higher education levels among Asian business owners explain much of their success relative to both white- and African American-owned businesses. Finally, Fairlie and Robb find that black entrepreneurs have fewer opportunities than white entrepreneurs to acquire valuable pre-business work experience through working in family businesses.

Bollinger on Bollinger Bands John Bollinger 2001-08-21 John Bollinger is a giant in today's trading community. His Bollinger Bands sharpen the sensitivity of fixed indicators, allowing them to more precisely reflect a market's volatility. By more accurately indicating the existing market environment, they are seen by many as today's standard—and most reliable—tool for plotting expected price action. Now, in *Bollinger on Bollinger Bands*, Bollinger himself explains how to use this extraordinary technique to compare price and indicator action and make sound, sensible, and profitable trading decisions. Concise, straightforward, and filled with instructive charts and graphs, this remarkable book will be essential reading for all serious traders, regardless of market. Bollinger includes his simple system for implementation, and techniques for combining bands and indicators.

Towards an Entrepreneurial Culture for the Twenty-first Century International Labour Office 2006 In line with the World Declaration on Education for All and the Millennium Goal of halving poverty in the world by the year 2015, education is expected to serve not only the acquisition of academic knowledge but also the preparation of young people for life and work. Secondary education has to meet the challenge of providing skills for successfully dealing with economies and work patterns in transition and changing cultural values. Education that makes young people entrepreneurial in a broad sense would be part of this solution. This volume draws on various experiences in entrepreneurial education around the world. It aims to provoke discussion on such questions as: How can we harness the imagination and entrepreneurial talents of secondary students as assets for development? How should these talents be channelled? What are the contents, subjects, topics that support the entrepreneurial process? What is the best institutional framework for entrepreneurship education? What kind of teacher is needed? How do we systematically measure the performance of entrepreneurship education and training?

Innovation and Entrepreneurship Peter Drucker 2014-09-15 How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. With a new foreword by Joseph Maciariello

Scaling for Success T. Brad Harris 2021-07-06 Managing a high-growth organization requires both strategy and adaptability. Unfortunately, start-up founders and executives seeking to scale up to the next level find all too frequently that growth turns into chaos. Rather than laying the groundwork for the future, organizations get stuck by covering up complex problems with unsustainable band-aids and duct-tape fixes, implementing anecdote-based solutions from the latest tech-industry unicorns or leadership books, and relying on too much on-the-fly learning from inexperienced managers. This book is the definitive guide for leaders of high-growth organizations seeking to understand and execute the people-management principles that are essential to continued success. Combining a wealth of practical experience, well-grounded academic research, and easy-to-apply frameworks, Andrew Bartlow and T. Brad Harris offer a practical toolkit that founders, functional leaders, and managers of people can use to rethink their practices to meet their organizations' needs. They help readers identify the core people-management programs and practices that are best for an organization at its current stage and size while also supporting a foundation for continued development and the capacity to adapt to inevitable surprises. Practical, actionable, and supplemented with numerous diagnostic tools and illustrative examples, *Scaling for Success* is a must-have playbook for organizational leaders pursuing smart and sustainable growth.

Hot in the Pot Sharon Weber 2008-09 ""By how I behave, you would think I care more about budget and schedules than people. That's not me." Barbara, project leader ""It's not enough to be a solid contributor eight hours a day; work has to invade your weekends and be all encompassing." Stephanie, catalog buyer" If you want to boil a frog (not that you would!), start with tepid water, where the frog will swim happily. By increasing the temperature one degree at a time, the frog will slowly adjust, but never recognize the increasing danger. Sadly, the frog will boil to death. This engaging -- and almost frightening -- analogy is Sharon Hoyle Weber's premise for "Hot in the Pot." If you work in a hard-driving workplace, do you seem to check your soul at the door? Does oppressive pressure cloud your cubicle? Is everyone way too serious? Are you slowly boiling? If so, "Hot in the Pot!" will awaken both your knowledge and senses to how the "real you" is boiling one degree at a time in the corporate world. Using the real-life challenges faced by a variety of corporate workers, Weber has synthesized "Twelve Principles" to help you recognize and escape the slow boil. Weber's energetic and engaging style helps you take your temperature and learn how to recover your real self at work. Use Weber's conscious balancing act to maintain your authentic, fun, and vibrant self by tossing in a few ice cubes to keep you cool!

The Velvet Mafia DARRYL W. BULLOCK 2020-10 Concentrating on the friendship between impresario Larry Parnes, Beatles manager Brian Epstein, and showbiz solicitor David Jacobs, the book details how they shaped the Swinging 60s, along with their associates including songwriter Lionel Bart (author of the hit musical *Oliver!*), record producer Joe Meek, Sir Joseph Lockwood (the head of EMI), Vicki Wickham (manager of Dusty Springfield and assistant producer on the influential TV show *Ready Steady Go*), and more. Drawing on rare and unpublished archive material, personal diaries, and new interviews from some of the survivors of that turbulent decade, the *Velvia Mafia* shows how—in the period leading up to the partial decriminalisation of homosexuality and the founding of the Gay Liberation movement—LGBT professionals in the music industry were working together, supporting each other, and changing history.

Entrepreneurship Education and Training Programs around the World Alexandria Valerio 2014-05-06 Entrepreneurship has attracted global interest for its potential to catalyze economic and social development. Research suggesting that certain entrepreneurial mindsets and skills can be learned has given rise to the field of entrepreneurship education and training (EET). Despite the growth of EET, global knowledge about these programs and their impact remains thin. In response, this study surveys the available literature and program evaluations to propose a Conceptual Framework for understanding the EET program landscape. The study finds that EET today consists of a heterogeneous mix of programs that can be broken into two groups: entrepreneurship education and entrepreneurship training. These programs target a range of participants: secondary and post-secondary education students, as well as potential and practicing entrepreneurs. The outcomes measured by program evaluations are equally diverse but generally fall under the domains of entrepreneurial mindsets and capabilities, entrepreneurial status, and entrepreneurial performance. The dimensions of EET programs vary according the particular target group. Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship, while post-secondary education programs emphasize skills related to strategic business planning. Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited. While programs serving practicing entrepreneurs focus on strengthening entrepreneurs knowledge, skills and business practices, which while unlikely to transform an enterprise in the near term, may accrue benefits to entrepreneurs over time. The study also offers implications for policy and program implementation, emphasizing the importance of clarity about target groups and desired outcomes when making program choices, and sound understanding of extent to which publicly-supported programs offer a broader public good, and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives.

International Enterprise Education Jason J. Turner 2018-01-31 The important debate on the growing graduate skills gaps, the value of universities to their business communities, and their role (or lack of) in building entrepreneurial attributes among graduates is growing internationally. Using case studies from universities across the globe, this edited book seeks to bring together leading authors with knowledge, and/or experience, of the challenges of embedding enterprise education in university and college programmes. The text identifies and presents the current debates around the future role of universities and colleges in providing 'fit for workplace' graduates, as well as offering insights into the challenges and practices involved in delivering innovative enterprise education. The approach collates examples of 'best practices' from global institutions enabling educators to develop 'blueprints' for implementing in their own institutions. This innovative and comprehensive text is designed to be a 'seminal resource' for academic stakeholders on enterprise education collating diverse international contributions from enterprising universities and colleges. Drawing on both theory and best practice, it provides invaluable guidance to researchers, educators and practitioners considering embedding or expanding enterprising activities into their learning strategy.

Entrepreneurship Education and Training Alicia Robb 2014-06-26 As governments worldwide invest heavily in entrepreneurial education and training (EET), this study examines the highly varied landscape of EET programs in Kenya, Ghana, and Mozambique. It draws on both global research and the experience of local stakeholders to deliver practical insights

Refiguring childhood Kevin Ryan 2020-10-27 Refiguring childhood stages a series of encounters with biosocial power, which is a specific zone of intensity within the more encompassing arena of biopower and biopolitics. Assembled at the intersection of thought and practice, biosocial power attempts to bring envisioned futures into the present, taking hold of life in the form of childhood, thereby bridging being and becoming while also shaping the power relations that encapsulate the social and cultural world(s) of adults and children. Taking up a critical perspective that is attentive to the contingency of childhoods - the ways in which particular childhoods are constituted and configured - this book offers a transversal genealogy that moves between past and present while also crossing a series of discourses and practices framed by children's rights (the right to play), citizenship, health, disadvantage, and entrepreneurship education. The overarching analysis converges on contemporary neo-liberal enterprise culture, which is approached as a conjuncture that helps to explain, and also to trouble, the growing emphasis on the agency and rights of children. It is against the backdrop of this problematic that the book makes its case for refiguring childhood, focusing on the how, where and when of biosocial power.

The Culture Map Erin Meyer 2014-05-27 An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.
