Christ, Muhammad and I Mohammad al-Ghazoli
2007-04 Mohammad Al Ghazoli was raised a

Muslim. But the more he read the ancient
literature of Islam, the more convinced he
became that Allah could not be the True God.

And the more he studied the life of Muhammad, the more obvious it became that Muhammad was not God's prophet. Then one day, someone placed a Bible in his hands and said, "Read." Soon Ghazoli had found the True God, and forgiveness through His Son. This book isn't just Ghazoli's testimony. It is much more than that. It contains the facts from the literature of Islam that shows why Allah can't possibly be the True God. It gives proof from Islam itself that whenever Muhammad wanted more wives, or riches, or when he had a problem, Gabriel was always standing by, ready to give another verse to

exempt Muhammad from the law and morality. How convenient! Many of the stories in the book will be unfamiliar to the Western reader, but very familiar to Muslims. It is this inside view of things that makes the book so powerful as a witnessing tool for Muslims. Over and over again, Ghazoli asks, Is this the behavior of a prophet who was sent by God? What kind of god would send a prophet like that? The arguments contained in this book will give you powerful evidence you can show to Muslims you may try to witness to. Because it is written by a respected Arab writer, who was an advisor to the Arab league and even

to Libyan ruler Qhadaffi, you can give the book to a Muslim and tell him, "Read." Learn about: The 220 contradictions in the Quran. Verses which reverse and replace prior verses. Did Allah make a mistake? The verses used to justify terrorism. Even the Quran admits Jesus was crucified! Then it denies it. Muhammad's 23 marriages, including one to a little girl.

Crown of the World Nathan Sadasivan 2009 Here is the tale of Godfrey de Montferrat, a boy who became both a monk and a knight who swore an oath to defend the Kingdom of Jerusalem. It is also the tale of that kingdom, which men called

Outremer-The Land Beyond the Sea. With the miraculous success of the First Crusade, all said that the heroic tales of old had come to life in that place. By Godfrey's time-the late 12th century-the Kingdom is dying, chivalry fading, hope growing cold, and foes pressing hard from every side. But Godfrey stands in contradiction to the prevailing rot-a young man striving to live up to the heroic ideal. Surrounded by greed and corruption, Godfrey must determine where his true loyalties lay: to friends? to prince? to love? to God? Around Godfrey swirl the loves, betrayals, triumphs, and disasters of the Kingdom's waning

years. Knight of the Temple weaves together an exciting, multi-layered and historically faithful tale of the Land Beyond the Sea. From the desert wastes of Egypt, to the bustling streets of medieval Antioch, to the Holy City of Jerusalem itself, Nathan Sadasivan paints a vivid portrait of the Crusades strewn with unforgettable characters - Amalric, the ill-tempered King of Jerusalem; Malik, the proud young Saracen; Jacques, Godfrey's childhood friend; Tristan, the single-minded swordmaster, and Andronicus, the enigmatic Byzantine prince, among many others Knight of the Temple is the first book in the

Crown of the World trilogy.

The Islamic Invasion Ph. D. Dr Robert a. Morey
2011-08 The Islamic Turks were poised to overrun Europe at The Battle of Vienna on September 11/12 of 1683, but were defeated. The Islamic Invasion As Mosques appear across the country people are asking-"What do I need to Know about Islam?" Islam-once an obscure Middle Eastern religion-has rapidly grown into the second largest religion in the world. There are now more Muslims than Episcopalians in the United States! What attraction does Islam hold for its followers? What part does it play in shaping the

outlook and attitudes of nearly one billion people? Noted author Dr. Robert A. Morey, internationally recognized authority on the origins of the teachings and rituals of Islam- explores the pre-Islamic history of Allah, and the doctrines and customs of Islam reveals Islam's teaching about current issues such as religious freedom and the role of women The Islamic Invasion will give you the insight you need to understand Islam and the challenge it poses today. Dr. Morey warned the United States and Europe about Islam during the early 1980's long before 9/11. Most books on Islam since 9/11 have used his analysis of the

Qur'an or Hadith. Special thanks to Professor Colin Akridge-who is a Vietnam Veteran and black scholar in the field of comparative religions- for his valuable and insightful contributions and working with him for researching and writing the section entitled The Black Muslim Movement in America. Two papers, those by Chaney and Featherstone

respectively, discuss aspects of this theme in a general, global context, all the others are concerned more specifically with the regional context of the Middle East. All the articles in this collection were [Environmental Education in Indonesia](#) Lyn Parker 2019-08-28 Indonesia's wealth of natural resources is being exploited at breakneck speed, and environmental awareness and knowledge among the populace is limited. This book examines how young people learn about the environment to see how education can help to develop environmental awareness and avert vast

environmental destruction, not only in Indonesia, but also in the Global South more generally. Based on in-depth studies conducted in the cities of Yogyakarta and Surabaya, complemented with surveys of students in secondary schools, *Environmental Education in Indonesia* examines educational curricula, pedagogy and "green" activities to reveal what is currently being done in schools to educate children about the environment. The book investigates the shortcomings in environment education, including underqualified teachers, the civil service mentality, the still-pervasive chalk-and-talk

pedagogy and the effect of the examination system. It also analyses the role of local government in supporting (or not) environmental education, and the contribution of environmental NGOs. The book establishes that young people are not currently being exposed to effective environmental education, and the authors propose that the best and most culturally appropriate way forward in Indonesia is to frame pro-environment behaviour and responsibility as a form of citizenship, and specifically that environmental education should be taught as a separate subject. This book will be of great

interest to students and scholars of contemporary Indonesia and Southeast Asia, education for sustainability and environmental education, as well as sustainability and sustainable development more generally.

A History of God Karen Armstrong 1994 The 4,000-year quest of Judaism, Christianity and Islam.

Self and Sovereignty Ayesha Jalal 2002-01-04

Self and Sovereignty surveys the role of individual Muslim men and women within India and Pakistan from 1850 through to decolonisation and the partition period. Commencing in colonial

times, this book explores and interprets the historical processes through which the perception of the Muslim individual and the community of Islam has been reconfigured over time. Self and Sovereignty examines the relationship between Islam and nationalism and the individual, regional, class and cultural differences that have shaped the discourse and politics of Muslim identity. As well as fascinating discussion of political and religious movements, culture and art, this book includes analysis of: * press, poetry and politics in late nineteenth century India * the politics of language and identity - Hindi, Urdu and Punjabi *

Muslim identity, cultural difference and nationalism
* the Punjab and the politics of Union and
Disunion * the creation of Pakistan Covering a
period of immense upheaval and sometimes
devastating violence, this work is an important
and enlightening insight into the history of
Muslims in South Asia.

Guidelines for the Programmatic Management of Drug-resistant Tuberculosis World Health

Organization 2006-01-01 The emergence of
resistance to drugs used to treat tuberculosis
(TB), particularly multidrug-resistant TB (MDR-
TB), has become a significant public health
problem in some countries, whilst in many others
the extent of the problem is unknown. These
guidelines set out updated recommendations for
TB control programmes in low and middle income

countries based on the best current knowledge in the management of MDR-TB. The guidelines are based on a flexible framework approach which can be adapted to suit diverse local circumstances. The DOTS strategy remains the most effective tool to prevent the onset and dissemination of drug resistance, and these guidelines focus on care for MDR-TB patients, in the hope and expectation that, in future, the occurrence of massive numbers of cases can be prevented through sound TB control practices.

Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution

Ratri Wulandari 2021-08-25 The 7th Bandung Creative Movement conference presented the theme "Dynamics of Industrial Revolution 4.0" which discussed how the digital world and connectivity changed human culture in various aspects of life, and transformed in accordance to human needs and social culture. Digital technology has transformed society to serve people from manufacturing needs to smart cities, from network connectivity to people connectivity. The application of information technology has helped in improving live quality and environmental sustainability. Digital transformation is

revolutionizing how businesses and workers interconnect to be more productive and efficient. The result is improved collaboration, faster processes and time-to-market, lower costs and better products. Devices are getting smarter, meaning they are able to perform more and more tasks without human intervention; moreover, these devices generate data that provide insights to further improve processes and gain greater efficiencies. Moreover, with the Internet of Things (IoT), all these smart devices are interconnected in ways that not only help make them even smarter, but also enhances the intelligence of the

overall system. Digital technology is a formidable driver for the transformation of a highly carbon-dependent world into one that is more ecologically 'smart.' We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals. Since its first announcement in 2011, industrial revolution 4.0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement. The 7th Bandung Creative Movement has brought forward

discussions on dynamic changes, ups and downs, innovations, relations of industrial revolution of the internet of thing, data, automation, to human physical world, new art and aesthetic, business, product innovation, built environment, and education.

The Land of Five Towers (English Edition) A.

Fuadi 2013-12-17 "Alif had never set foot outside of West Sumatra. He passed his childhood days searching for fallen durian fruit in the jungle, playing soccer on rice paddies, and swimming in the blue waters of Lake Maninjau. His mother wants him to attend an Islamic boarding school, a

pesantren, while he dreams of public high school. Halfheartedly, he follows his mother's wishes. He finds himself on a grueling three-day bus ride from Sumatra to Madani Pesantren (MP) in a remote village on Java. On his first day at MP, Alif is captivated by the powerful phrase man jadda wajada. He who gives his all will surely succeed. United by punishment, he quickly becomes friends with five boys from across the archipelago, and together they become known as the Fellowship of the Manara. Beneath the mosque's minaret, the boys gaze at the clouds on the horizon, seeing in them their individual

dreams of far-away lands, like America and Europe. Where would these dreams take them? They didn't know. What they did know was: never underestimate dreams, no matter how high they may be. God truly is The Listener. The Land of Five Towers is the first book in a trilogy written by A. Fuadi—a former TEMPO & VOA reporter, photography buff, and a social entrepreneur. He went to George Washington University and Royal Holloway, University of London for his masters. A portion of the royalties from the trilogy are intended to build Komunitas Menara, a volunteer-based social organization which aims to provide

free schools, libraries, clinics and soup kitchens for the less fortunate. To learn more about Komunitas Menara and their activities, check out www.negeri5menara.com"

Global Tuberculosis Report 2019 World Health Organization 2019-08-12 WHO has published a global TB report every year since 1997. The main

aim of the report is to provide a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease, at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States, broader development goals set by the United Nations (UN) and targets set in the political declaration at the first UN high-level meeting on TB (held in September 2018). The 2019 edition of the global TB report was released on 17 October 2019. The data in this report are updated annually. Please

note that direct comparisons between estimates of TB disease burden in the latest report and previous reports are not appropriate. The most recent time-series of estimates are published in the 2019 global TB report.

Supernova Dewi Lestari *Supernova: The Knight, The Princess and the Falling Star* presents a series of intertwined and unconventional love stories, straight and gay, with a bit of science and spirituality added to the mix. The major characters are young, urban, and technologically highly aware. They are caught up in major forms of contemporary social conflict. The work has been

highly acclaimed. The poet Taufiq Ismail has written: "A renewal has taken place in Indonesian literature over the past decade. *Supernova* is an intelligent, unique and truly exciting exploration of science, spirituality and the nature of love." The literary critic Jacob Soemardjo suggests: "This is an attractive novel by a young writer. It is an intellectual work in the form of a work of pop art, set in the real world. It opposes old values with new ways of understanding, so that readers can see the world in a different way."

The Lean CEO: Leading the Way to World-Class Excellence Jacob Stoller 2015-04-10 Drawing on in-depth interviews with some of the best known Lean-practicing CEOs, this groundbreaking book shows how to implement lean in virtually every

type of company and facet of the organization
The power of lean to build world-class performance requires a corporate-wide commitment to long term continuous improvement that very few organizations have made. The Lean CEO bridges the gap between lean and conventional management practices in a way that addresses the specific needs of executives. Filled with narratives from leaders who have taken the lean journey with great success, The Lean CEO offers a detailed account of how top executives have reconciled lean activity with traditional management practices in order to meet broad

corporate objectives. Readers learn how to use lean to eliminate waste, reduce costs, spark innovation, improve quality and delivery, engage employees, and build a sustainable future. Jacob Stoller is a business journalist with expertise in implementing lean throughout entire organizations.

World Congress on Medical Physics and Biomedical Engineering 2018 Lenka Lhotska 2018-05-29 This book (vol. 1) presents the proceedings of the IUPESM World Congress on Biomedical Engineering and Medical Physics, a triennially organized joint meeting of medical

physicists, biomedical engineers and adjoining health care professionals. Besides the purely scientific and technological topics, the 2018 Congress will also focus on other aspects of professional involvement in health care, such as education and training, accreditation and certification, health technology assessment and patient safety. The IUPESM meeting is an important forum for medical physicists and biomedical engineers in medicine and healthcare learn and share knowledge, and discuss the latest research outcomes and technological advancements as well as new ideas in both

medical physics and biomedical engineering field. **The Divine Bureaucracy and Disenchantment of Social Life** Maznah Mohamad 2020-03-02 This book traces the expansion of Islamisation within a modern and plural state such as Malaysia. It elaborates on how elements of theology, sacred space, resources, and their interactivity with secular instruments such as legislative, electoral, and new social technological platforms are all instrumentally employed to consolidate a divine bureaucracy. The book makes the point that religious social movements and political parties are only few of the important agents of

Islamisation in society. The other is the modern and secular state structure itself. Weber's legal rational bureaucracy or Hegel's ethical bureaucracy predominantly characterises a modern feature of governmentality. In this instance an Islamic bureaucracy is advantageously situated not only within an ambit of modernity and therefore legality, but divinity and therefore sacrality as well. This positioning gives religious state agents more salience than any other form of bureaucracy leading to their unquestioned authority in the current contexts of societies with Muslim majority rule. One of the

requisites of this condition is the homogenisation of Islam followed by ring-fencing of its constituents. The latter can involve contestations with women, other genders, 'secular' Muslims, non-Muslims as well as dissenting Muslims with their differing truthful 'Islams'.

How to Be Alone Jonathan Franzen 2007-05-15
Passionate, strong-minded nonfiction from the National Book Award-winning author of *The Corrections* Jonathan Franzen's *The Corrections* was the best-loved and most-written-about novel of 2001. Nearly every in-depth review of it discussed what became known as "The Harper's

Essay," Franzen's controversial 1996 investigation of the fate of the American novel. This essay is reprinted for the first time in *How to be Alone*, along with the personal essays and the dead-on reportage that earned Franzen a wide readership before the success of *The Corrections*. Although his subjects range from the sex-advice industry to the way a supermax prison works, each piece wrestles with familiar themes of Franzen's writing: the erosion of civic life and private dignity and the hidden persistence of loneliness in postmodern, imperial America. Recent pieces include a moving essay on his father's struggle with Alzheimer's

disease (which has already been reprinted around the world) and a rueful account of Franzen's brief tenure as an Oprah Winfrey author. As a collection, these essays record what Franzen calls "a movement away from an angry and frightened isolation toward an acceptance--even a celebration--of being a reader and a writer." At the same time they show the wry distrust of the claims of technology and psychology, the love-hate relationship with consumerism, and the subversive belief in the tragic shape of the individual life that help make Franzen one of our sharpest, toughest, and most entertaining social

critics.

Reflections on the Human Condition Eric Hoffer
1973 This collection of aphorisms and philosophical comment represents Eric Hoffer at his best. It offers stunning insights that strike home with startling frequency, often most uncomfortably; it has a fine unity, a well-defined theme. That some of the statements invite argument and questioning is inevitable and stimulating. Here is a book of the "wry epigram and the icy aphorism" which made his earlier books so appealing and gained for him a wide audience.--Publisher description.

Contemporary Management and Science Issues in the Halal Industry Faridah Hassan 2019-05-19

The proceedings volume focuses on halal management and science topics. Issues related to business model, management, marketing, finance, food security, lifestyle, hospitality, tourism, cosmetics, personal care, legal aspects, technologies and sciences are presented in the chapters. In addition, the book also covers comprehensive areas of halalan toyyiban chains of production from raw materials, ingredients, planning, manufacturing, packaging, logistics, delivery, warehousing, marketing to consumption.

Various survey results and few cases explore practical solutions to these issues of interest to academics in university settings as well as practitioners in different industries and government agencies.

Routledge Handbook on Islam in Asia Chiara Formichi 2021-10 "The Routledge Handbook of Islam in Asia offers both new and established scholarship on Muslim societies and religious practices across Asia, from a variety of interdisciplinary angles, with chapters covering South, Central, East and Southeast Asia, as well as Africa-Asia connections. Presenting work

grounded in archival, literary, and ethnographic inquiry, contributors to this handbook lend their expertise to paint a picture of Islam as deeply connected to and influenced by Asia, often by-passing or reversing relationships of power and authority that have placed 'Arab' Islam in a hierarchically superior position vis-à-vis Asia. This handbook is structured in four parts, each representing an emergent area of inquiry: Frames Authority and Authorizing Practices Muslim Spatialities Imaginations of Piety Dislodging ingrained assumptions that Asia is at the periphery of Islam - and that Islam is at the

periphery of Asia's cultural matrix - this handbook sets an agenda against the 'centre-periphery' dichotomy, as well as the syncretism paradigm that has dominated conversations on Islam in Asia. It thus demonstrates possibilities for new scholarly approaches to the study of Islam within the 'Asian context'. This ground-breaking handbook is a valuable resource to students and scholars of Asian studies, religious studies, and cultural studies more broadly"--

Islam in Modern Turkey Sukran Vahide

2012-02-16 A biography of the prominent Turkish theologian and thinker. *Islam in Modern Turkey*

presents one of the most comprehensive studies in English of the seminal Turkish thinker and theologian, Bediuzzaman Said Nursi (1876–1960). A devout Muslim who strongly believed in peacefully coexisting with the West, Nursi inspired a faith movement that has played a vital role in the revival of Islam in Turkey and now numbers several million followers worldwide. While Nursi's ideas have been afforded considerable analysis, this book is the first to situate these ideas and his related activities in their historical contexts. Based on the available sources and Nursi's own works, here is a

complete and balanced view of this important theologian's life and thought. Sçükran Vahide is Resident Scholar at the Istanbul Culture and Science Foundation in Istanbul, Turkey. Ibrahim M. Abu-Rabi> is Professor of Islamic Studies and Christian-Muslim Relations at the Hartford Seminary. He edited and wrote the introduction for *Islam at the Crossroads: On the Life and Thought of Bediuzzaman Said Nursi*, also published by SUNY Press.

The Rainbow Troops Andrea Hirata 2013-02-05 Published in Indonesia in 2005, *The Rainbow Troops*, Andrea Hirata's closely autobiographical debut novel, sold more than five million copies, shattering records. Now it promises to captivate audiences around the globe. Ikal is a student at the poorest village school on the Indonesian island of Belitung, where graduating from sixth grade is considered a remarkable achievement.

His school is under constant threat of closure. In fact, Ikal and his friends—a group nicknamed the Rainbow Troops—face threats from every angle: skeptical government officials, greedy corporations hardly distinguishable from the colonialism they've replaced, deepening poverty and crumbling infrastructure, and their own low self-confidence. But the students also have hope, which comes in the form of two extraordinary teachers, and Ikal's education in and out of the classroom is an uplifting one. We root for him and his friends as they defy the island's powerful tin mine officials. We meet his first love, the unseen

girl who sells chalk from behind a shop screen, whose pretty hands capture Ikal's heart. We cheer for Lintang, the class's barefoot math genius, as he bests the students of the mining corporation's school in an academic challenge. Above all, we gain an intimate acquaintance with the customs and people of the world's largest Muslim society. This is classic storytelling in the spirit of Khaled Hosseini's *The Kite Runner*: an engrossing depiction of a milieu we have never encountered before, bursting with charm and verve.

Voice in My Head Lilian Chan 2015

The Medicalization of Marijuana Michelle Newhart
2018-08-22 Medical marijuana laws have spread across the U.S. to all but a handful of states. Yet, eighty years of social stigma and federal prohibition creates dilemmas for patients who participate in state programs. *The Medicalization of Marijuana* takes the first comprehensive look at how patients negotiate incomplete medicalization and what their experiences reveal about our relationship with this controversial plant as it is incorporated into biomedicine. Is cannabis used similarly to other medicines? Drawing on interviews with midlife patients in Colorado, a

state at the forefront of medical cannabis implementation, this book explores the practical decisions individuals confront about medical use, including whether cannabis will work for them; the risks of registering in a state program; and how to handle questions of supply, dosage, and routines of use. Individual stories capture how patients redefine and reclaim cannabis use as legitimate—individually and collectively—and grapple with an inherently political identity. These experiences help illustrate how stigma, prejudice, and social change operate. By positioning cannabis use within sociological models of

medical behavior, Newhart and Dolphin provide a wide-reaching, theoretically informed analysis of the issue that expands established concepts and provides new insight on medical cannabis and how state programs work.

2012-01-01 This volume brings together new scholarship by Indonesian and non-Indonesian scholars on Indonesia's cultural history from 1950-1965. During the new nation's first decade

and a half, Indonesia's links with the world and its sense of nationhood were vigorously negotiated on the cultural front.

Genesis, Zen and Quantum Physics – A Fresh Look at the Theology and Science of Evolution

Jeff A. Benner 2011-10-11 Since ancient times man has sought to understand the origins of the universe around him, and his place within it. Such speculations were once the sole purview of religion, but since the Enlightenment, science and rationality have also attempted to explain these mysteries, but from an opposing perspective. Conflict resulted and both sides dug in, clinging to

dogmas that precluded any consideration of the other side. "Genesis, Zen and Quantum Physics" enters the fray with a very unique approach. Believing that harmony, rather than conflict, defines the relationship between the Genesis account and modern science; the authors have retranslated the creation story according to the ancient Hebrew pictographic language and in the context of the nomadic culture from which the language and narratives arose. The resulting translation and its accompanying commentary challenge the common understanding of God, science, and the very reason for man's existence.

By harmonizing an accurate biblical account with cutting edge scientific understanding, the authors present a mature religious ideal and an appreciation for the understanding of the ancients for modern scientific concepts. This is a book that will redefine your understanding of God, the world around you and your role within it.

Islam and Orientalism Maryam Jameelah 2007

Islamic Economics and COVID-19 Masudul Alam

Choudhury 2021-02-04 This book is a timely exploration of an unprecedented, cataclysmic pandemic episode. It examines certain critical aspects of socio-scientific theory across a variety

of diverse themes, and through an epistemic lens.

The book investigates the general theory of pandemic episodes and their adverse long-term effects on human and environmental wellbeing. It includes an in-depth study of COVID-19 but also looks to the future to contemplate potential pandemics to come. The existing approach to the study of pandemics is critically examined in terms of the prevalent isolated and thus mutated way of viewing human and mechanical relations in the name of specialization and modernity. The book presents a novel model of science-economy-society moral inclusiveness that forms a

distinctive theoretical approach to the issue of normalizing all forms of pandemic challenges. It is methodologically different from existing economic theory, including the critical study of microeconomic foundations of macroeconomics. Human and environmental existence along with its multidisciplinary outlook of unity of knowledge between modernity, traditionalism, and socio-cultural values is emphasized in the treatment and cure of pandemic episodes. The book is a unique reference work, offering fresh wisdom within the moral methodological worldview.

Islam and Muslim Societies 2019-04 Islam is

more than a religion in the strict theological sense. If we confine ourselves to doctrinal normativity and Islamic law to analyse what Muslims motivate and how they build religious landscapes and life worlds, we seriously narrow down our understanding of Islam. Islamic society is a universal society, found at every place, in East and West, in south and north, and found at all time. It was not only found at the time of the Prophet, but also before his time, and at the time of other Messengers from Adam to Jesus (peace be upon them all), and after their time. Koranic teachings promote an ascetic ethic of self-control

that bears on virtually all aspects of everyday activity. For Muslims, faith has not merely been a matter of private life and a personal relation with God. It has had pervasive social consequences. The Holy Qur'an and the traditions of the Prophet are concerned about Muslim and Islamic society. In many ways these holy books focuses on the importance of Islamic society. Because Allah and his prophet believes that Muslims Ummah are the best among all Adam's generation. Consequently, Islamic religion takes them out from the darkness into the light in order to achieve happiness, felicity in this world and the Hereafter. This book Islam

and Muslim Societies consists of studies dealing with political, economic, legal, and social policies that affect every facet of the social life of Muslims. This book is aimed at bridging the gap between the textual and contextual approaches to Islamic Studies; and solving the dichotomy between 'orthodox' and 'heterodox' Islam. It contains a selection of studies written by scholars and authors dealing with Islam and Muslim societies as its central focus of academic inquiry and to encourage comprehensive consideration of its many facets; to provide an opportunity for the study of Islam and Muslim societies in their global

context; to encourage interdisciplinary studies of the Islamic world that are cross-national and comparative; to promote the diffusion, exchange and discussion of research findings; and to encourage interaction among academics from various traditions of learning.

Global Tuberculosis Report 2016 World Health Organization 2016-10-13 This global tuberculosis report is the first to be produced in the era of the SDGs and the End TB Strategy. It provides an assessment of the TB epidemic and progress in TB diagnosis, treatment and prevention efforts, as well as an overview of TB-specific financing and

research. It also discusses the broader agenda of universal health coverage, social protection and other SDGs that have an impact on health. Data were available for 202 countries and territories that account for over 99% of the world's population and TB cases.
