Truth Beyond the Matrix Ronald Fellion 2016-01-15 Questioning some commonly accepted metaphysical beliefs and explaining how they are programs-beliefs of control designed to keep a person within this earthly matrix. How to escape these programs and this system by changing your beliefs.

Jung and the Alchemical Imagination Jeffrey Raff 2000-11-15 Jung and the Alchemical Imagination illustrates the spiritual nature of Jungian psychology and the debt it owes to the tradition of esoteric religion. Unlike other books on Jung and alchemy which contain a psychological interpretation of alchemical material, this work uses alchemy to understand the three cornerstones of Jungian spirituality--the self, the transcendent function, and active imagination. Through the interpretation of alchemical imagery, Raff explains the nature of these three concepts and illustrates how together they form a new model of contemporary Western spirituality. This book is also unique in selecting alchemical texts for analysis that are relatively unknown and which, for the most part, have never been interpreted. In addition, he presents two new concepts--the ally and the psychoid realm. Through the addition of these ideas, and the new understanding that they offer, it is possible to apply alchemical imagery to transpsychic experience/ that is, to a world of spirits which may not be reduced to psychological concepts. By including this realm in the study of alchemy and Jungian thought, it is possible to gain insights into the nature of visionary and ecstatic experiences that form part of the path of individuation--the road to completion.

Little Blue Planet Michele Downs 2016-03-19 Lucky child - what a wondrous world you live in! This is the theme of Little Blue Planet - a book meant to be read aloud to very young children. As you and the child explore the pages of this book, you will encounter the natural wonders of our world: forests, jungles, volcanoes, swamps, coral reefs and many more. Each of these wonders is captured in a two-page spread, with a scenic watercolor on the left and an imaginative view featuring a child on the right. This book is a first travelogue for the tiny set. It is primarily a picture book, but has just enough text to provide context and encourage the child to imagine what it would be like to visit this place. This book makes for a beautiful and quick read.

The Animus Barbara Hannah 2011-06 Authenticity and comprehensiveness were priorities in editing this work, as well as the preservation of the excellence and comprehensiveness of her work on the animus - a most complex and vexing topic - while retaining the wonderfully natural spirit of Barbara Hannah herself.

Alchemical Active Imagination Marie-Louise von Franz 2017-06-13 Although alchemy is popularly regarded as the science that sought to transmute base physical matter, many of the medieval alchemists were more interested in developing a discipline that would lead to the psychological and spiritual transformation of the individual. C. G. Jung discovered in his study of alchemical texts a symbolic and imaginal language that expressed many of his own insights into psychological processes. In this book, Marie-Louise von Franz examines a text by the sixteenth-century alchemist and physician Gerhard Dorn in order to show the relationship of alchemy to the concepts and techniques of analytical psychology. In particular, she shows that the alchemists practiced a kind of meditation similar to Jung's technique of active imagination, which enables one to dialogue with the unconscious archetypal elements in the psyche. Originally delivered as a series of lectures at the C. G. Jung Institute in Zurich, the book opens therapeutic insights into the relations among spirit, soul, and body in the practice of active imagination.

Creative Stress James O'Dea 2010-09 Creative Stress reveals with precision how we can and must transmute negative stress so that we can evolve individually and collectively. It offers the reader a steady climb to the higher reaches of human creativity and fulfillment, and is packed with compelling stories from O'Dea's exceptionally rich experience.

Lectures on Jung's Aion (Polarities of the Psyche) [Paperback] Barbara Hannah 2015-07-15 Aion, a major work from Jung's later years, has long been a source of fascination for a wide variety of scholars and thinkers. Presented here are two substantial commentaries on this rich and complex text by two important figures in Jung's life and work: Barbara Hannah and Marie-Louise von Franz. Hannah delivered these lectures in 1957 at the C.G. Jung Institute in Zurich. She addresses each chapter of Aion, providing detailed, in-depth analysis of selected passages, while suggesting resources for further study. Well-paced and thoughtfully planned, she scans the work from beginning to end, illuminating many subtle nuances. In a private interview with Claude Drey in her home during the spring of 1965, Marie-Louise von Franz looks closely at chapter fourteen of Aion-"The Structure and Dynamics of the Self." Published here for the first time, von Franz offers a lively and free-flowing discussion of key passages in Jung's work. This is the first volume in a new series edited by Emmanuel Kennedy-Xypolitas, "Polarities in the Psyche," focusing on the broad theme of the opposites in the psyche. The second volume will be The Archetypal Symbolism of Animals (also from Chiron Publications)."

Jung on Art Tjeu Van den Berk 2012 In this book, Tjeu van den Berk examines C. G. Jung's personal perspective on art and how his work intensely engages with this theme. It analyses Jung's profound reflections on artistic considerations such as how we experience art, the specific qualities in the perception of beauty, the nature of the creative process and the aesthetic attitude. Jung on Art considers Jung's feelings about art simply being 'art' rather than reducing it to a moral, political, religious or psychological product. It also discusses Jung's notion that the artist is only a breeding ground for a piece of art, and once complete, the piece has an independent existence. Topics covered include: symbolism the difference between art and aesthetics Jung's ideas about himself as an artist the psychology of art Jung's perspective on modern art and surrealism. This book will be of great interest to all Jungian scholars, as well as those interested in the meeting of Jung and art.

Catholicism and Jungian Psychology J. Marvin Spiegelman 1994-01-01 A masterwork of the highest degree, CATHOLICISM AND JUNGIAN PSYCHOLOGY is a rare example of a cooperative venture done right. Created by an ecumenical group of twenty-one renowned Jungian analysts, psychologists, and scholars from many religious traditions, it is filled with thought-provoking material that is both timely and timeless.

A Time to Mourn Verena Kast In what is often called her most important book, Verena Kast examines the role of mourning in the therapeutic process. Working as a psychotherapist, Frau Kast has often observed depressive illnesses caused by painful losses, which have not been adequately mourned. Traditionally, mourning has not been a subject of psychologists' attention. Frau Kast uses dreams to illustrate the stages of mourning and shows systematically how the unconscious stimulates us to encounter our grief. Mourning marks an end but it also fosters personal growth. It is a time of renewal, a time for incubation, for introspection, for going into oneself to gather strength, as a seed goes deep into the earth to find the resources for striving toward the light.

Encounters with the Soul Barbara Hannah 2001 Barbara Hannah, Jungian analyst and author, explores Jung's method of "active imagination," often considered the most powerful tool in analytical psychology for achieving direct contact with the unconscious and attaining greater inner awareness. Using historical and contemporary case studies, Hannah traces the human journey toward personal wholeness. This approach to confronting the unconscious is a healing process that applies to both men and women and deals in depth with the injured feminine as well as many powerful archetypal forces. Encounters with the Soul is the first and only book I know of which can promote the understanding of 'active imagination' by illustrating through various examples, the steps, pitfalls and successes of this method of encountering the unconscious. -Marie-Louise von Franz Barbara Hannah (1891-1986) was born in England. She went to Zürich in 1929 to study with Carl Jung and lived in Switzerland the rest of her life. A close associate of Jung until his death, she was a practicing psychotherapist and lecturer at the C.G. Jung Institute. Her books available from Chiron include The Archetypal Symbolism of Animals; Encounters with the Soul; Jung, His Life and Work: A Biographical Memoir; and Striving Toward Wholeness.

Far from This Land Michael Gellert 2021-08-15 This book is inspired by the author's dreams and visionary experiences in response to brain surgery. Unfolding as a dialogue between different parts of his personality, its story is told from the perspective of an alter ego, a skeptical part of him that could not believe and accept these astonishing dreams and visions. Throughout his story, he is resistant to accepting his near-death experience--an extraordinary one by most standards. He has to fight his way to embracing, reluctantly, the implications this experience has for his personal development as well as his understanding of human evolution. The book explores such topics as the workings of the unconscious mind (dreams, visions, and paranormal phenomena); the evolution of consciousness and of our planet; and the psychological and spiritual dimension of climate change. Though very much about the afterlife, it has profound implications for our everyday lives. "A remarkable book that sets in motion the dreamscape of the unconscious mind. Gellert applies Jung's active imagination techniques with great originality. The evolutionary material is fascinating, taking a deep dive into the philosophy of theologian Pierre Teilhard de Chardin, among other things." --Wendy Goldman Rohm, New York Times bestselling author

Imagination as Space of Freedom Verena Kast 1993-01-01 Imagining has long been used as a therapeutic tool. Carl Jung developed the concept further by introducing Active Imagination, in which the creative powers of the unconscious produce images which are then addressed by the ego. While Jung never described this method in book form, Kast explains it thrillingly to the lay reader.

At the Heart of Matter J. Gary Sparks 2007 An extraordinary book important both for its clarification of the phenomenon of synchronicity and for its implications for the survival of Western civilization.The author, scientist and Jungian analyst, takes readers gently through a basic understanding of physics, from classical Newtonian to modern quantum, and weds that to C.G. Jung's long-standing inquiry into the enigmatic relationship between matter and spirit, selfhood and destiny.

Striving Towards Wholeness Barbara Hannah 1971 This title is an analysis of the psychic processes that move people to strive for wholeness of personality. Through a series of case studies - the biographies of Robert Louis Stevenson, the Bronte sisters and others - the author aims to broaden the concepts of analytical psychology.

Politics of the Imagination Colin Bennett 2008-06-01 A great American crank, in the best sense of the word, Charles Hoy Fort (1874-1932) spent his life hunting down reports of "anomalous phenomena"-"damned" events such rains of frogs, cattle mutilations, and UFO sightings-and studying them from a true outsider's perspective, one that characterized even objective science as wearing blinders in its approach to them. In this modern classic of analytical biography, Colin Bennett examines not only the life of this one-man investigator of real-life X-Files but his work as well, likening him to such diverse figures that loom in the cultural imagination as Lee Harvey Oswald and Shakespeare's Hamlet. A must-read for fans of the strange, this riveting book explores why the 20th century, which gave rise to conspiracy-theory philosophies and widespread distrust of social authority, embraced Fort so wholly that his name has been immortalized in the adjective "Fortean." In the course of a delightfully misspent youth, COLIN BENNETT was employed as both a musician and as a mercenary soldier. He was far better at the second than at the first. Educated at Balliol College, Oxford, he is the author of the novels Infantryman and The Entertainment Bomb, and paranormal nonfiction including Looking for Orthon, a biography of George Adamski; Politics of the Imagination, a biography of Charles Fort; and An American Demonology, about the head of the 1950s UFO-hunting agency Project Blue Book.

The Secret Raven Daryl Sharp 1980 A concise illustration of the meaning and purpose of neurosis, with particular attention to puer psychology, anima and shadow, the mother complex, individuation and dream symbolism. Focus on the life of Franz Kafka. Illustrated.

Jungian Symbolic Psychology Carlos Amadeu Botelho Byington 2012 Jungian symbolic psychology created by Carlos Byington reformulates the concept of archetype in analytical psychology and of defense in psychoanalysis to encompass the conscious and unconscious as well as the subjective and objective psychological dimensions inspired in Heidegger's conception of being. Within the symbolic archetypal dimension, he conceives the alterity archetype (which includes the anima and animus archetypes) and the totality archetype, which he differentiates from the central archetype of the Self. Following Erich Neumann, Byington adds these two new archetypes to the matriarchal and patriarchal archetypes. Describing these four archetypes as the structuring archetypal quaternio, he conceives the ego-other archetypal positions of consciousness as the archetypal forms of intelligence. Amid the forms of archetypal intelligence described, Byington distinguishes the dialectic intelligence of the alterity archetype (anima and animus) as the highest form of human intelligence capable of relating polarities within a spectrum that varies from opposition to equality and is present in democracy, in artistic and scientific creativity, and in love. With the same archetypes described in the individuation process, Byington formulates an archetypal theory of history based on Hegel's philosophy and Teilhard de Chardin's concept of the humanization process. The historical humanization of the alterity archetype centered in compassion is described in the myth of Christ in the West and in the myth of Buddha in the East. The dialectic of polarities of the alterity archetype, which permeates the book, reveals the complementarily of psychoanalysis and analytical psychology, to ex-press the formation of the shadow as the dysfunction of the individuation process. In the last chapter, Byington illustrates the individuation process and the humanization process with the myth of Oedipus and the archetype of sanctity, reuniting in Jungian symbolic psychology concepts of psychoanalysis, analytical psychology, and Heidegger's ontology. Based on the expansion of the concepts of archetype and symbol to en-compass consciousness, unconscious, and the subjective and objective dimensions of' being, Jungian symbolic psychology transforms modern psychology and psychopathology by associating analytical psychology's concept of the shadow and the concept of' defense mechanism within ontology in psychoanalysis. The five archetypal positions of the ego-other polarity conceived by Byington al-low us to differentiate and interrelate the central archetype (Self), the matriarchal and the patriarchal archetypes, the Alterity archetype (anima and animus), and the totality archetype in the individual and cultural Selves. Differentiating between the patriarchal shadow, which expresses itself through authoritarianism and ecological destruction, and the compassionate, democratic, and sustainable characteristics of the alterity archetype, the author elaborates archetypally the central dilemma of modern humankind seen as the main condition for our survival.

Barbara Hannah 1998-03 This biography, a full-scale study of Jung's life and work by a pupil, friend, and close associate for more than thirty years, is a lucid, penetrating account of Jung's career that stresses the essential wholeness of the man and traces the difficult path by which that wholeness was achieved. From his earliest years to his death, through the crowded inner and outer events of his long lifetime, this study presents a view of the real Jung rather than the creature of legend. Treating side by side his theoretical apparatus and such personal matters as his relationship with Toni Wolff and his supposed flirtation with Nazism, it reveals, more than any other work to date, Jung's humanity and his genius as a "navigator of the unconscious." "Hannah's book is a warm, very personal biographical memoir: She provides much information about Jung's early life, and her interweaving of events in his life with the development of Jung's theory is well done....The book fills in many gaps left by Jung's autobiography, Memories, Dreams , Reflections (1 963). Hannah tells a good story; the book is well written and presents a good overview of Jung's life and work. C. G. Jung 2020-10-13 Until now, the single most important unpublished work by C.G. Jung—The Black Books. In 1913, C.G. Jung started a unique self- experiment that he called his "confrontation with the unconscious": an engagement with his fantasies in a waking state, which he recorded in a series of notebooks referred to as The Black Books. These intimate writings shed light on the further elaboration of Jung's personal cosmology and his attempts to embody insights from his self- investigation into his life and personal relationships. The Red Book drew on material recorded from 1913 to 1916, but Jung actively kept the notebooks for many more decades. Presented in a magnificent, seven-volume boxed collection featuring a revelatory essay by noted Jung scholar Sonu Shamdasani—illuminated by a selection of Jung's vibrant visual works—and both translated and facsimile versions of each notebook, The Black Books offer a unique portal into Jung's mind and the origins of analytical psychology.

Synchronicity, Science and Soul-Making Victor Mansfield 1995 The pioneering analysis of synchronicity was given by Jung, yet despite the concept's momentous significance in Jung's work, and despite the widespread dissemination of the term 'synchronicity' even within pop culture, synchronicity is often badly misconstrued and remains "perhaps the least understood of Jung's theories". Synchronicity, Science, and Soul-Making has already been hailed as the most important analysis of synchronicity since Jung himself.

Jung's Red Book For Our Time Murray Stein 2020-03-12 Edited by Murray Stein and Thomas Arzt, the essays in the series Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions are geared to the recognition that the posthumous publication of The Red Book: Liber Novus by C. G. Jung in 2009 was a meaningful gift to our contemporary world. "To give birth to the ancient in a new time is creation," Jung inscribed in his Red Book. The essays in this volume continue what was begun in Volume 1 of Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions by further contextualizing The Red Book culturally and interpreting it for our time. It is significant that this long sequestered work was published during a period in human history marked by disruption, cultural disintegration, broken boundaries, and acute anxiety. The Red Book offers an antidote for this collective illness and can be seen as a link in the aurea catena, the "golden chain" of spiritual wisdom extending down through the ages from biblical times, ancient Greek philosophy, early Christian and Jewish Gnosis, and alchemy. The Red Book is itself a work of creation that gives birth to the old in a new time. This is the second volume of a three-volume series set up on a global und multicultural level and includes essays from the following distinguished Jungian analysts and scholars: - Murray Stein and Thomas Arzt Introduction - John Beebe The Way Cultural Attitudes are Developed in Jung's Red Book - An "Interview" - Kate Burns Soul's Desire to become New: Jung's Journey, Our Initiation - QiRe Ching Aging with The Red Book - Al Collins Dreaming The Red Book Onward: What Do the Dead Seek Today? - Lionel Corbett The Red Book as a Religious d104 - John Dourley Jung, the Nothing and the All - Randy Fertel Trickster, His Apocalyptic Brother, and a World's Unmaking: An Archetypal Reading of Donald Trump - Noa Schwartz Feuerstein India in The Red Book Overtones and Undertones - Grazina Gudaite Integrating Horizontal and Vertical Dimensions of Experience under Postmodern Conditions - Lev Khegai The Red Book of C.G. Inner Work Robert A. Johnson 2009-11-03 From Robert A. Johnson, the bestselling author of Transformation, Owning Your Own Shadow, and the groundbreaking works He, She, and We, comes a practical four-step approach to using dreams and the imagination for a journey of inner transformation. In Inner Work, the renowned Jungian analyst offers a powerful and direct way to approach the inner world of the unconscious, often resulting in a central transformative experience. A repackaged classic by a major name in the field, Robert Johnson's Inner Work enables us to find extraordinary strengths and resources in the hidden depths of our own subconscious.

Margaret Eileen Meredith 2005 This fascinating study grew out of the author's abiding interest in gardening as a metaphor for the process of individuation.

Jungian Crime Scene Analysis Aaron B. Daniels 2018-05-01 This book presents the serial killer as having 'imagopathy' - that is, a disorder of the imagination - manifested through such deficiencies as failure of empathy, rigid fantasies, and unresolved projections. The author argues that this disorder is a form of failed alchemy. His study challenges long-held assumptions that the Jungian concept of individuation is a purely healthful drive. Serial killers are unable to form insight after projecting untenable material onto their victims. Criminal profilers must therefore effect that insight informed by their own reactions to violent crime scene imagery, using what the author asserts is a form of Jung's 'active imagination'. This book posits sexual homicides as irrational shadow images in our rationalistic modern culture. Consequently, profilers bridge conscious and unconscious for the inexorably splintered killer as well as the culture at large.

Body and Soul Albert Kreinheder 1991 A feelings-intutitive approach to physical illness, vividly illustrating the symbolic attitude and active imagination with the body. The author was 76 when he died of cancer in 1990. Refreshingly candid and straight from the heart, Body and Soul reflects a life well and truly lived in relation to the Self.

Barbara Wuest 2017-05-21 My father's suspicious death, perhaps at the hands of a small town sheriff's department, forced my mother to flee our hometown--Idamay, West Virginia--a few days after he died in 1954. She was told that he'd hung himself in a jail cell in Fairmont, West Virginia, where he was being held for driving while intoxicated. She was afraid they would do something to her and leave us kids orphaned. Though we left Idamay, that town and our devastating loss followed us. My father's absence, though seldom spoken about, was "present" everywhere we turned. My mother never looked back. But when she died forty-two years later, his death came back to me in full force. I felt compelled to investigate further. I'd heard conflicting stories all my life. This book documents an investigation that yields more questions than answers for the seven-year-old survivor who has an insatiable need to know. This book is about this seven-year-old whose entire life was indelibly marked by this tragic loss that she experienced when she had just reached what is often called the age of reason. Her quest for the truth takes her to places she'd never dreamed she could go. Because there is so much she doesn't know, she finds herself leaning heavily on her imagination to help her to navigate this mysterious and fatherless world.

C. G. Jung 2015-02-17 All the creative art psychotherapies (art, dance, music, drama, poetry) can trace their roots to C. G. Jung's early work on active imagination. Joan Chodorow here offers a collection of Jung's writings on active imagination, gathered together for the first time. Jung developed this concept between the years 1913 and 1916, following his break with Freud. During this time, he was disoriented and experienced intense inner turmoil --he suffered from lethargy and fears, and his moods threatened to overwhelm him. Jung searched for a method to heal himself from within, and finally decided to engage with the impulses and images of his unconscious. It was through the rediscovery of the symbolic play of his childhood that Jung was able to reconnect with his creative spirit. In a 1925 seminar and again in his memoirs, he tells the remarkable story of his experiments during this time that led to his self-healing. Jung learned to develop an ongoing relationship with his lively creative spirit through the power of imagination and fantasies. He termed this therapeutic method "active imagination." This method is based on the natural healing function of the imagination, and its many expressions. Chodorow clearly presents the texts, and sets them in the proper context. She also interweaves her discussion of Jung's writings and ideas with contributions from Jungian authors and artists.

Tito Barberi Martinez 2015-01-21 The Pinnacle of Power, first book in the Keeper of the Balance Trilogy, combines all of the classic elements of epic fantasy and sci-fi with a little touch of political intrigue mystery, suspense, espionage and romance.

Man and His Symbols Carl Gustav Jung 1964 Explores Jung's psychological concepts regarding the nature, function and importance of man's symbols as they appear on both the conscious and subconscious level

The Healing Imagination Ann Ulanov 2008 This eloquent work speaks of the centrality of imagination in the life of the spirit. Ann and Barry Ulanov describe the imagination as a bridge between the psyche and the spirit. Using rich imagery drawn from literature, film, and their own experience as therapists, they unlock for us the healing power of our imagination. "Imagination heals by building a bridge sturdy enough to link us up, each of us, to the river of being already present in us, to the currents flowing through us and among us in our unconscious life". After describing this healing power of imagination, the authors go on to show how it is vital in the spiritual life: in preaching, prayer, teaching, counselling, and politics.

C. G. Jung and the Dead Stephani L. Stephens 2019-07-24 C. G. Jung and the Dead: Visions, Active Imagination and the Unconscious Terrain offers an in-depth look at Jung's encounters with the dead, moving beyond a symbolic understanding to consider these figures a literal presence in the psyche. Stephani L. Stephens explores Jung's personal experiences, demonstrating his skill at visioning in all its forms as well as detailing the nature of the dead. This unique study is the first to follow the narrative thread of the dead from Memories, Dreams, Reflections into The Red Book, assessing Jung's thoughts on their presence, his obligations to them, and their role in his psychological model. It offers the opportunity to examine this previously neglected theme unfolding during Jung's period of intense confrontation with the unconscious, and to understand active imagination as Jung's principle method of managing that unconscious content. As well as detailed analysis of Jung's own work, the book includes a timeline of key events and case material. C. G. Jung and the Dead will offer academics and students of Jungian and post-Jungian studies, the history of psychology, Western esoteric history and gnostic and visionary traditions a new perspective on Jung's work. It will also be of great interest to Jungian analysts and psychotherapists, analytical psychologists and practitioners of other psychological disciplines interested in Jungian ideas.
