Critical Disability Studies and the Disabled Child

Harriet Cooper 2020-03-20 This book examines

the relationship between contemporary cultural

representations of disabled children on the one

hand, and disability as a personal experience of

internalised oppression on the other. In focalising

this debate through an exploration of the

politically and emotionally charged figure of the

disabled child, Harriet Cooper raises questions

both about what it means to ‘speak for’ the other and about what resistance means when one is unknowingly invested in one’s own abjection. Drawing on both the author’s personal experience of growing up with a physical impairment and on a range of critical theories and cultural objects – from Frances Hodgson Burnett’s novel *The Secret Garden* to Judith Butler’s work on injurious speech – the book theorises the making of disabled and ‘rehabilitated’ subjectivities. With a conceptual framework informed by both psychoanalysis and critical disability studies, it investigates the ways in which cultural anxieties

about disability come to be embodied and lived by the disabled child. Posing new questions for disability studies and for identity politics about the relationships between lived experiences, cultural representations and dominant discourses – and demonstrating a new approach to the concept of ‘internalised oppression’ – this book will be of interest to scholars and students of disability studies, medical humanities, sociology and psychosocial studies, as well as to those with an interest in identity politics more generally.

Flood and Coastal Erosion Risk Management

Edmund Penning-Rowse 2014-01-03 A new

‘Multi-Coloured Manual’ This book is a successor

to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management, produced by the Flood Hazard Research Centre at Middlesex University, UK, with support from Defra and the Environment Agency. It builds upon a previous book known as the “multi-coloured manual” (2005), which itself was a synthesis of the blue (1977), red (1987) and yellow manuals (1992). As such it expands and updates this work, to provide a manual of assessment techniques of flood risk management benefits, indirect benefits, and coastal erosion risk management benefits. It has

three key aims. First it provides methods and data which can be used for the practical assessment of schemes and policies. Secondly it describes new research to update the data and improve techniques. Thirdly it explains the limitations and complications of Benefit-Cost Analysis, to guide decision-making on investment in river and coastal risk management schemes.

The Life of Abraham Lincoln Henry Ketcham 1901 "In his introduction to The Life of Abraham Lincoln, Henry Ketcham notes that there has

been so much written about Lincoln that the legend has begun to obscure, if not to efface, the man. In this biography the single purpose has been to present the living man with such distinctness of outline that the reader may have a sort of feeling of being acquainted with him.

Ketcham's clearly-written, unadorned account of Lincoln's life achieves its stated purpose, never removing its focus from the man who became the 16th President of the United States and led the nation through some of its most turbulent and difficult times."--Amazon.com

Seeking Safety Lisa M. Najavits 2021-05-07 This manual presents the first empirically studied, integrative treatment approach developed specifically for co-occurring PTSD and substance abuse. For persons with this prevalent and difficult-to-treat dual diagnosis, the most urgent clinical need is to establish safety--to work toward discontinuing substance use, letting go of dangerous relationships, and gaining control over such extreme symptoms as dissociation and self-harm. The manual is divided into 25 specific units or topics, addressing a range of different cognitive, behavioral, and interpersonal domains.

Each topic provides highly practical tools and techniques to engage patients in treatment; teach "safe coping skills" that apply to both disorders; and restore ideals that have been lost, including respect, care, protection, and healing. Structured yet flexible, topics can be conducted in any order and in a range of different formats and settings. The volume is designed for maximum ease of use with a large-size format and helpful reproducible therapist sheets and handouts, which purchasers can also download and print at the companion Web page. Diversity and Education Michael Vavrus

2015-04-28 In his new book, Michael Vavrus helps readers better understand why issues of diversity and difference are so highly contested in the United States and across the globe. Vavrus incorporates specific education examples throughout the text to examine six contested areas: race and ethnicity; socioeconomic class and culture; multicultural and ethnic studies; language; religion; and sexuality and gender. In each of these areas, the author explores how contrasting worldviews found in social

conservatism, liberal multiculturalism, and critical multiculturalism influence our understandings about difference and diversity and the education policies we develop as a result. Diversity and Education is designed to help educators move beyond the “how can they believe that?” knee-jerk reaction toward a more informed, strategic understanding of belief systems and political affiliations. Book Features: Brings a contemporary, 21st-century perspective to differing political orientations toward diversity and education. Examines outcomes of diversity debates on children of color, the poor,

immigrants, women, and sexual and religious minorities. Uses critical pedagogy with a historical and political economy lens to explain current diversity issues in education. Critiques the diversity stance of new national teacher education standards from the Council for Accreditation of Educator Preparation. “Diversity and Education can not only help us have conversations about racism, institutionalized oppression, and cultural fear, it can also offer an intervention that can move readers towards a deeper critical consciousness about diversity and multicultural education in their own lives.” —From the

Foreword by Wayne Au, associate professor at the University of Washington, Bothell, and an editor for Rethinking Schools “Few education scholars have offered as potent and cogent a political and economic analysis of multicultural education and diversity as Professor Michael Vavrus has in his new book. His critique of neoliberalism via critical pedagogy and his advocacy of social justice education are timely and praiseworthy.” –Ramin Farahmandpur, professor, Graduate School of Education, Portland State University “Diversity and Education is a must-read for anyone concerned

about why so many policies claiming to ‘help’ diverse students fail, and what alternatives exist. Vavrus clearly believes in the power of teachers who are well-educated critical thinkers. In this lucid and compelling text, he skillfully applies a highly useful framework to unpack historical and contemporary debates about core concepts underlying multiple struggles for education and rights.” –Christine Sleeter, professor emerita, California State University, Monterey Bay
Lemon-Aid New Cars and Trucks 2013 Phil Edmonston 2012-12-01 Canada’s automotive "Dr. Phil" says there’s never been a better time to buy

a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to

best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

Practice and Innovations in Sustainable Transport

Tariq Muneer 2020-05-28 The book continues with an experimental analysis conducted to obtain accurate and complete information about electric vehicles in different traffic situations and road conditions. For the experimental analysis in this study, three different electric vehicles from the Edinburgh College leasing program were equipped and tracked to obtain over 50 GPS and energy consumption data for short distance journeys in the Edinburgh area and long-range tests between Edinburgh and Bristol. In the

following section, an adaptive and robust square root cubature Kalman filter based on variational Bayesian approximation and Huber's M-estimation is proposed to accurately estimate state of charge (SOC), which is vital for safe operation and efficient management of lithium-ion batteries. A coupled-inductor DC-DC converter with a high voltage gain is proposed in the following section to match the voltage of a fuel cell stack to a DC link bus. Finally, the book presents a review of the different approaches that have been proposed by various authors to mitigate the impact of electric buses and electric

taxi on the future smart grid.
