My Gopro Hero Camera Jason Rich 2015 My GoPro Hero Camera offers a comprehensive introduction to using the most recently released GoPro Hero camera models, including the basic GoPro Hero, GoPro Hero3+ and the GoPro Hero4. All three of these cameras utilize the same basic operating system and menus, but each has slightly different features, functions and possible shooting resolutions for digital images and video. After offering an initial introduction to the cameras themselves, as well as their menus and buttons, this book offers an overview of the different camera housings and mounts available, plus explains how to utilize the GoPro mobile app and computer software. How to best use other "must have" GoPro accessories, including the Wi-Fi Remote and the LCD Touch BacPac display are also be covered. Throughout the book are hundreds of shooting tips and strategies that teach readers how to capture the best possible photos and videos in a wide range of situations. Strategies for shooting professional-quality first and third-person photos/videos, as well as traditional photos/video, plus ways to achieve the best possible results indoors, outdoors, underwater, in low-light situations, and in high-action situations are covered. This book appeals to those who purchased a GoPro camera to take on vacation or to capture "family moments," as well as to more active people who want to capture crystal-clear "action" images or videos of themselves engaged in various activities, using their GoPro camera in conjunction with the best combination of optional camera accessories, housings and mounts, based on their activity and the shooting conditions. How and why all of the accessories, housings, mounts, menu options and camera settings were used to capture the sample content is explained in the text and with plenty of visual examples within the book. Some additional companion video content is available through the Que website.

**A Time to Hustle** George G. Shepherd, III 2012-04-01 Navy fighter pilot Tim Johnson returns home to South Florida from Vietnam in 1973 with a plan. In order to execute it he will need the help of his younger brother Tommy and his less than scrupulous friends but trying to keep things a secret and off the radar of law enforcement may be harder than he thinks. Based on events and accounts, *A Time to Hustle* is a gripping pulse pounding ride into the illegal and dangerous underworld of the narcotics trade in the 1970's. This story is fiction. It is loosely based on actual events that happened a long time ago. All of the names and locations have been altered. Please do not try anything described or depicted in the following pages. Personal injury or death may result. Drug use, organized crime, and smuggling are illegal and not encouraged by the author. Any similarity to persons living or dead is coincidental and not intended by the author. Reader discretion is definitely advised.

**Feminist Research for 21st-century Childhoods** B. Denise Hodgins 2019-03-21 This book is a collection of feminist childhood studies stories from field research with educators, young children, and/or early childhood student-educators that explores the challenges, tensions, and possibilities of common worlds research methods for the 21st century. Grounded in a common worlding orientation, the contributing authors grapple with complex methodological understandings within postqualitative practices within settler colonial states: Australia, Canada, South Africa, and the United States. Each chapter presents a method the authors have put to work in their efforts to unsettle the interpretative power of Euro-Western developmental knowledges and anthropocentric frameworks to reimagine research amid the colonialist, social, and environmental challenges we face today. The research(ing) stories act as provocations for generating innovative, relational, and emergent methods to attend to the complexity of 21st-century childhoods. Just as developmental and sociological perspectives gave birth to new forms of inquiry within childhood studies in 19th-century industrialization and 20th-century urban change respectively, the 21st-century requires novel questions, practices, and methodologies to enhance the childhood studies lexicon. In the field of childhood studies, where settler colonial and neoliberal logics have so much clout, such strategies are crucial. *Feminist Research for 21st-century Childhoods* is an important and relevant read for anyone working and researching with children.

*An Attempt at Exhausting a Place in Paris* Georges Perec 2010 By Georges Perec.

**Flicking Boogers in the Wind** Jonathan Bricklin 2014-07-14 Jonathan Bricklin's debut novel is astounding for its intellectual playfulness and verbal ingenuity, and for the exuberant voice of Willy Nilly, the young hero of this unexpected adventure. Telepathy, Tetherball, Turtles, Politics, Pirates, Lemonade, Cryogenics, Waterslides and Holograms are some of the ingredients in this madcap frenzy of metaphorical escapism. If Raymond Chandler and Tom Robbins adopted a baby it might grow up to write a book like this.

**Sensors and Techniques for 3D Object Modeling in Underwater Environments** Fabio Menna 2018-09-28 This book is a printed edition of the Special Issue "Sensors and Techniques for 3D Object Modeling in Underwater Environments" that was published in Sensors

**Very High Resolution (VHR) Satellite Imagery** Francisco Eugenio 2019-11-06 Recently, growing interest in the use of remote sensing imagery has appeared to provide synoptic maps of water quality parameters in coastal and inner water ecosystems;, monitoring of complex land ecosystems for biodiversity

conservation; precision agriculture for the management of soils, crops, and pests; urban planning; disaster monitoring, etc. However, for these maps to achieve their full potential, it is important to engage in periodic monitoring and analysis of multi-temporal changes. In this context, very high resolution (VHR) satellite-based optical, infrared, and radar imaging instruments provide reliable information to implement spatially-based conservation actions. Moreover, they enable observations of parameters of our environment at greater broader spatial and finer temporal scales than those allowed through field observation alone. In this sense, recent very high resolution satellite technologies and image processing algorithms present the opportunity to develop quantitative techniques that have the potential to improve upon traditional techniques in terms of cost, mapping fidelity, and objectivity. Typical applications include multi-temporal classification, recognition and tracking of specific patterns, multisensor data fusion, analysis of land/marine ecosystem processes and environment monitoring, etc. This book aims to collect new developments, methodologies, and applications of very high resolution satellite data for remote sensing. The works selected provide to the research community the most recent advances on all aspects of VHR satellite remote sensing.
