Blood Infernal James Rollins 2015-02-10 In a masterpiece of supernatural mystery and apocalyptic prophecy, New York Times bestselling author James Rollins and Rebecca Cantrell bring to a thunderous conclusion their epic trilogy of novels set between the worlds of shadow and light, between salvation and damnation, where the very gates of Hell must be shattered to discover the true fate of humankind in... Blood Infernal As an escalating scourge of grisly murders sweeps the globe, archaeologist Erin Granger must decipher the truth behind an immortal prophecy foretold in the Blood Gospel, a tome written by Christ and lost for centuries. The shackles of Lucifer have been loosened, and his Chalice remains lost. It will take the light of all three to forge the Chalice anew and banish him again to his eternal darkness. With the Apocalypse looming, Erin must again join forces with Army Sergeant Jordan Stone and Father Rajin Korza to search for a treasure lost for millennia. But the prize has already fallen into the hands of their enemy, a demon named Legion, before whom even the walls of the Vatican will fall. The search for the key to salvation will take Erin and the others across centuries and around the world, from the dusty shelves of the Vatican's secret archives to lost medieval laboratories, where ancient alchemes were employed to horrific ends. All the while, they are hunted, besieged by creatures of uncanny skill and talent. As clues are dug free from ancient underground chapels and found frozen in icy mountain caverns, one that will destroy not only her, but all she loves. To protect the world, Erin must walk through the very gates of Hell and face the darkest of enemies: Lucifer himself. With The Blood Gospel, the first novel in the Order of the Sanguines series, James Rollins and Rebecca Cantrell combined science, myth, and religion to introduce a breathtaking world where miracles hold new meaning and the fight for good over evil is far more complicated than we ever dreamed. And now, in this epic conclusion to the Sanguines trilogy, Blood Infernal, they take us to the very pit of Hell itself, making us peer into the abyss and face our greatest fears, to answer the ultimate question: What price will we pay for true salvation?

McDonnell F2H-3/4 Steve Ginter 2012-01 The F2H-3/4 Banshee ("Big Banjo") was a direct outgrowth of the F2H-1 and F2H-2 series of Korean war fighter and recon jets (see Naval Fighters #73 Early Banshees). It became the US Navy's first single seat all-weather carrier interceptor. To satisfy its mission the F2H-3/4 was required to have a significant increase in range. To accomplish this the internal fuel capacity was more than doubled by stretching the fuselage by 8 feet 1.6 inches. This gave the F2H-3/4 a combat range with tip tanks of 1,490 nautical miles. In addition to the fuselage extension, the tail surfaces of the F2H-3/4 were also redesigned. The horizontal tail was moved down to the rear of the fuselage tail cone and given a 10 degree dihedral. To accommodate the enlarged radar unit the four nose-mounted cannons were moved aft along the lower fuselage sides. The difference in the F2H-3 and F2H-4 was in the radar. The F2H-3 used the Westinghouse APQ-41 with a 28" dish and the F2H-4 was equipped with the Hughes APG-37 radar. The F2H-4 further differs from the -3 by having up-rated J34-WE-38 engines. The larger engines allowed for a service ceiling of 56,000 ft. The aircraft also had increased wing stations and was capable of carrying sidewinder air-to-air missiles. The aircraft were active with the Navy and Marines from 1952 through 1959. It was operated by 31 active Navy and Marine squadrons which histories appear in the book along with squadron insignia. The book also includes a chapter on Royal Canadian F2H-3s.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Roman City and its Periphery Penelope Goodman 2006-11-07 The first and only monograph available on the subject, The Roman City and its Periphery offers a full and detailed treatment of the little-investigated aspect of Roman urbanism - the phenomenon of suburban development. Presenting archaeological and literary evidence alongside sixty-three plans of cities, building plans, and photographs, Penelope Goodman examines how and why Roman suburbs grew up outside Roman cities, what was distinctive about the nature of suburban development, and what contributions buildings and activities in the suburbs might make to the character and function of the city as a whole. With full bibliography and annotations throughout, this will not only provide a coherent treatment of an essential theme for students of Roman urbanism, but archaeologists, urban planners and geographers also, will have an excellent comparative tool in the study of modern urbanism.

The G3 Battle Rifle Leroy Thompson 2019-05-30 During the Cold War, the G3 was one of the world's pre-eminent battle rifles. Developed in France and Spain after 1945, the rifle was produced by the German arms manufacturer Heckler & Koch. Adopted by more than 40 countries and produced on licence by many more, it was widely employed during colonial wars in Africa, insurgencies in Latin America and conflicts in the Middle East, but perhaps its widest use was in the Iran-Iraq War. Variants of the G3 have also seen substantial usage among Special Forces including Britain's Special Boat Service and the US Navy SEALs. Semi-automatic versions, especially the HK91 and HK93, remain popular in the United States, and the G3-derived HK11 and HK21 family of light machine guns have also been widely adopted by military and law-enforcement units across the world. Fully illustrated with specially commissioned artwork, this study examines one of the iconic weapons of the Cold War era.

From Jailer to Jailed Bernard B. Kerik 2015-03-31 The controversial New York City police commissioner and New York Times bestselling author of The Lost Son shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His role as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former federal prison inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn't always fit the crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

The Great Suppression Zachary Roth 2016 "Roth [examines] the deep historical roots of [what he sees as conservatives'] anti-egalitarian worldview, and introduces us to its modern-day proponents: the GOP officials pushing to make it harder to cast a ballot; the lawyers looking to scrap all limits on money in politics; the libertarian scholars reclaiming judicial activism to roll back the New Deal; and the corporate lobbyists working to ban local action on everything from the minimum wage to the environment"--

Phillip Killicoat 2007 Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-

country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed.
