Foreign Languages for Everyone Irene Brouwer Konyndyk 2011 ENDORSEMENTS "This book is a conduit for students, teachers, and teacher educators -- a carefully guided path to making language learning not only possible, but meaningful and fun " --Marjorie Hall Haley, PhD, Board of Directors of the American Council on the Teaching of Foreign Languages (ACTFL), Director of Foreign Language Teacher Licensure, George Mason University "Professor Konyndyk has developed a foreign-language pedagogy that makes students' deserts bloom. Foreign-language instructors and special educators will

find themselves grateful to her for this contribution. --Lynn E. Snyder, PhD, CCC-SLP, Professor Emerita and Former Director of the Center for Language and Learning, University of Colorado at Boulder "Though I was told for such a long time 'No, you can't, ' you constantly were a voice saying 'Yes, you can and you will.' You not only helped show me that the world of language is one that is possible for me, but you also showed me the way that we . . . can have such a positive impact on the lives of others." --a personal note from one of Irene's own at-risk students ABOUT FOREIGN LANGUAGES FOR EVERYONE "This book is about how I learned to teach a second language to those who either have failed before or were not really given a chance to succeed. I wrote it to help others to be smart, productive teachers of foreign languages to students with learning disabilities. The book called me. My life journey prepared and inspired me to write it." --Irene Brouwer Konyndyk, from her preface Foreign Languages for Everyone is based on Professor Irene Brouwer Konyndyk's careful study and classroom experience teaching foreign languages effectively to students with learning disabilities. The goal of serving at-risk students became highly personal for Irene when she realized that her own daughter had a learning disability but could succeed academically with the right combination of

multisensory learning experiences. This is a wonderfully practical and inspiring book loaded with practical tips and pedagogical insights for successfully teaching foreign languages to children, young people, high school and college students, and older adults who have difficulty learning a second language. ABOUT IRENE AND HER FREE ONLINE RESOURCES Irene Brouwer Konyndyk has taught languages at all levels -- from elementary through college. The Second Language Learning Processes of Students with Specific Learning Difficulties Judit Kormos 2016-12-08 The Second Language Learning Processes of Students with Specific Learning Difficulties is the only recent book available to offer a detailed and in-depth discussion of the second language learning processes of students with specific learning difficulties (SpLDs). It summarizes research advances in the fields of cognitive and educational psychology and integrates them with recent studies in the area of second language acquisition (SLA). Thus the book is relevant not only to readers who are particularly interested in the role of specific learning difficulties in learning additional languages, but also to those who would like to understand how individual differences in cognitive functioning influence SLA. The book focuses on four important areas that are particularly relevant for language learners with SpLDs: the processes of SLA in general and the development of reading skills in particular, the effectiveness of pedagogical programs, the assessment of the language competence of students with SpLDs and

identifying SpLDs in another language. The book also views learners with SpLDs in their social and educational contexts and elaborates how the barriers in these contexts can affect their language learning processes. This is an excellent resource for language teachers, students, and researchers in the areas of second language acquisition and applied linguistics.

Speaking, Reading, and Writing in Children With Language Learning Disabilities

Katharine G. Butler 2001-12-01 The ability to use language in more literate ways has always been a central outcome of education. Today, however, "being literate" requires more than functional literacy, the recognition of printed words as meaningful. It requires the knowledge of how to use language as a tool for analyzing, synthesizing, and integrating what is heard or read in order to arrive at new interpretations. Specialists in education, cognitive psychology, learning disabilities, communication sciences and disorders, and other fields have studied the language learning problems of school age children from their own perspectives. All have tended to emphasize either the oral language component or phonemic awareness. The major influence of phonemic awareness on learning to read and spell is well-researched, but it is not the only relevant focus for efforts in intervention and instruction. An issue is that applications are usually the products of a single discipline or profession, and few integrate an understanding of phonemic awareness with an understanding of

the ways in which oral language comprehension and expression support reading, writing, and spelling. Thus, what we have learned about language remains disconnected from what we have learned about literacy; interrelationships between language and literacy are not appreciated; and educational services for students with language and learning disabilities are fragmented as a result. This unique book, a multidisciplinary collaboration, bridges research, practice, and the development of new technologies. It offers the first comprehensive and integrated overview of the multiple factors involved in language learning from late preschool through post high school that must be considered if problems are to be effectively addressed.

Practitioners, researchers, and students professionally concerned with these problems will find the book an invaluable resource.
