Ford 429/460 Engines Jim Smart 2021-12-20 Learn to make incredible horsepower from Ford's most powerful big-block engine design. For years, Ford relied on the venerable FE big-block engine design to power its passenger cars, trucks, and even muscle cars—and why not? The design was rugged, reliable, amortized, and a proven race winner at Le Mans and drag strips across the country.

However, as is always the case with technology, time marches on, and Ford had a new design with many improvements in mind.

Enter the 385 family of engines (also known as the “Lima” big-block). Produced from 1968–1998, the 385-series engines were used in multiple applications from industrial trucks to muscle cars and luxury cruisers. In **Ford 429/460 Engines: How to Build Max Performance**, which was written by Ford expert Jim Smart, all

aspects of performance building are covered, including engine history and design, induction systems, cylinder heads, the valvetrain, camshaft selection, the engine block, and rotating assemblies. The best options, optimal parts matching, aftermarket versus factory parts, budget levels, and build levels are also examined. The 429/460 engines are a good platform for stroking, so that is covered here as well.

Whether you want to build a torque-monster engine for your off-road F-150, a better-performing version of a 1970s-era smog motor for your luxury Lincoln, or an all-out high-horsepower mill for your muscle car, this book is a welcome addition to your performance library.

Anything But Average, an Autobiography David Boyce

2017-12-07 David was

always meant to explore the back roads of the American southwest. For him, the more remote, the better; and the more beautiful, the more intellectually enticing. He always wanted to see for himself what those empty places on the map actually looked like. As a teenager, he hiked across Yosemite, harvested crops up the coast, and climbed major peaks in three states. As a Navajo speaker, he spent many years on the Indian Reservation, as a missionary and as a trader. Back in Utah, he began studying the geology of the Colorado Plateau. He has worked many jobs, including small business owner, miner, prospector, and assayer. But the job of geologist/tour guide for the local university was meant for him. A visitor on one of his tours described him as .."an inspiring example of a person following his interests until he found his calling." True, David feels that sharing the southwest

is his destiny. If he could live anywhere he wanted, he would choose southern Utah.
