[Hidden in Plain Sight](#) David K. Leff 2012-06-21 In the course of the mundane routines of life, we encounter a variety of landscapes and objects, either ignoring them or looking without interest at what appears to be just a tree, stone, anonymous building, or dirt road. But the “deep traveler,” according to Hartford Courant essayist David K. Leff, doesn’t make this mistake. Instead, the commonplace elements become the most important. By learning to see the magic in the mundane, we not only enrich daily life with a sense of place, we are more likely to protect and make those places better. Over his many years working at the Connecticut Department of Environmental Protection and writing about the state’s landscape, Leff gained unparalleled intimacy while traveling its byways and back roads. In Hidden in Plain Sight, Leff’s essays and photographs take us on a point-by-point journey, revealing the rich stories behind many of Connecticut’s overlooked landmarks, from the Merritt Parkway and Cornwall’s Cathedral Pines to roadside rock art and centuries-old milestones.

[Generations](#) Neil Howe 1992-09-30 Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, Generations has been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading. William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of Generations allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millenium. Generations is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

Deep Travel David K. Leff 2009-04 While very much a living voice, the poems' speaker is not a consistent self but a mutable figure buffeted by tenderness, terror, irony, or lust into elaborate evasions, exclamations, verbal hijinks, and lyric flights. As its title suggests, Spar embodies both resistance and aspiration, while its epigraphs further emphasize the simultaneous allure and danger of the unknown within the sensual and material worlds and in the mind itself.

Brentwood Brentwood Historical Society 2014-10-20 Brentwood Borough, established in 1915, spans one of the highest ridges in Allegheny County, Pennsylvania, just six miles southeast of Pittsburgh. In the 19th century, three small villages, four inns, and several blacksmith shops clustered along the rural ridge. A popular and primitive roadway, now known as Brownsville Road, connected these three hamlets with the wider world. This major artery carried coaches, wagons, livestock, and even escaping slaves to Pittsburgh. At least one of the four inns was a stop on the Underground Railroad. Many years later, the community established a 28-acre park, complete with shelter house and swimming pool, as well as the later additions of ball fields, tennis courts, and a football stadium. In keeping with its original focus on education, the community has maintained its own school district. Brownsville Road, as a main street, has supported several viable shopping districts. Brentwood is renowned for its annual Fourth of July parade, attracting tens of thousands of spectators each year. Today, Brentwood encompasses 1.45 square miles. The strength of this small community lies with its residents, who value service and commitment. For 100 years, Brentwood has maintained its own distinct character and charm, combining the elements of a modern community with the friendliness of a small town.

Indian Affairs in Colonial New York Allen W. Trelease 1997-01-01 Indian Affairs in Colonial New York is a standard in the study of Indian-European relations in seventeenth-century New York. First published in 1960, it remains the only one-volume history to explore these complex relations, which profoundly affected the economy and politics of the colony. Allen W. Trelease describes the Dutch period that followed Henry Hudson's voyage in 1609 and New Netherland's dealings with the Algonquian bands of the Hudson Valley and Long Island. The second half of the book, treating the English period after 1664, emphasizes the colonists' relations with the Iroquois.

Forest and Crag Laura Waterman 2019-02-28 A compelling story of our ever-evolving relationship with the mountains and wilderness. Thirty years after its initial publication, this beloved classic is back in print. Superbly researched and written, Forest and Crag is the definitive history of our love affair with the mountains of the Northeastern United States, from the Catskills and the Adirondacks of New York to the Green Mountains of Vermont, the White Mountains of New Hampshire, and the mountains of Maine. It's all here in one comprehensive volume: the struggles of early pioneers in America's first frontier wilderness;

the first ascent of every major peak in the Northeast; the building of the trail networks, including the Appalachian Trail; the golden era of the summit resort hotels; and the unforeseen consequences of the backpacking boom of the 1970s and 80s. Laura and Guy Waterman spent a decade researching and writing Forest and Crag, and in it they draw together widely scattered sources. What emerges is a compelling story of our ever-evolving relationship with the mountains and wilderness, a story that will fascinate historians, outdoor enthusiasts, and armchair adventurers alike. Just like a good map is essential equipment for any backcountry adventure, Forest and Crag is an essential read for anyone who enjoys spending time in or is charged with the stewardship of the Northeast's trails and mountains. Michael DeBonis, Executive Director, Green Mountain Club Forest and Crag stands as the most important history of Northeastern mountain exploration. I marvel at the depth of the Watermans' exhaustive research and the skill in which they synthesized it. Anyone who cares about and writes about mountains laps up these chapters regularly. I reach for this book all the time. The added photographs and prefaces make this new edition from SUNY even better. Christine Woodside, editor of Appalachia Journal and author of Libertarians on the Prairie: Laura Ingalls Wilder, Rose Wilder Lane, and the Making of the Little House Books No other volume weaves together across landscapes and time both the individual stories and broad themes of the history of hiking in the Northeast. It is not, however, its breadth and depth which makes Forest and Cragunique. Rather, it is the Watermans' gift for storytelling which makes the reader feel that he or she has been invited to pull up a chair and listen, spellbound, to two masters of their craft. In sharing the stories of those who came to the mountains before, the Watermans invite all to join in preserving the future of these iconic landscapes. Julia Goren, Education Director and Summit Steward Coordinator, Adirondack Mountain Club PRAISE FOR FOREST AND CRAG This is a superb, monumental history. The Watermans are adept at the capsule profile, whether of peaks or persons. A gallery of characters unrolls, as diverse as those in a novel by Dickens. Paul Jamieson, former editor, The Adirondack Reader Written with grace, style, and good humor, seasoned with a refreshing sense of wonder, Forest and Crag reads more like a gripping novel than the serious research work it really is. Magnetic North In its quality, comprehensiveness, and regional orientation, Forest and Crag is unprecedented in American letters. It will become a classic in social, intellectual, and environmental history. Roderick Frazier Nash, author of Wilderness and the American Mind, Fifth Edition Forest and Crag presents an incredible gift for today's hikersthe opportunity to take a thoughtful and vigorous ramble into the past, and to explore the Northeastern mountains of yesteryear. What an adventureand what better way to contemplate how we shape the region's future? Peter Crane, Mount Washington Observatory Forest and Crag traces the Northeast's human and natural history by following the hiking experience from the early adventurers to the more recent development of an environmental ethic. The Watermans tell this story with clear respect and deep joy for the mountains that shaped the stories of the region's hikers and hiking clubs. Mary Margaret Sloan, Chief Operating Officer, Positive Tracks The Watermans' true genius is their ability to string all the facts together in a narrative so lively that even the footnotes and endnotes are read as eagerly as one would devour dessert at the end of a good meal. Tony Goodwin, coeditor of High Peaks Trails, 14th Edition
