*Stroke of Love (Love in Bloom* Melissa Foster 2014-03-01 IN STROKE OF LOVE... Kate Paletto runs a volunteer program in Belize for Artists for International Aid, where she deals with self-centered artists who use the program as a means to repair their marred reputations. She loves the country, the people, and what AIA stands for, but too many diva volunteers have turned her off to press-seeking celebrities altogether and left her questioning the value of the volunteer program. When she meets incredibly handsome and charming Sage, he stirs emotions she hasn't felt for ages, even though he represents the things she despises. Laid-back artist Sage Remington escapes his wealthy lifestyle in the Big Apple for a two-week journey of self-discovery to figure out how a guy who has so much can feel so empty. When he meets ultra-organized

Kate, who lives her life the way he's always dreamed of living his, the attraction is too hot to ignore, but Sage is there to figure out what's missing in his life, not to find a woman. Every look, and every late-night chat in the romantic jungle brings them closer together, but Sage can barely think past stripping away Kate's misconceptions about him. Kate fights him every step of the way-- even though she finds it hard to ignore the strikingly handsome, generous-to-a-fault artist who wants to do nothing more than right the wrongs of the world--and love her to the ends of the earth. **\*\*BONUS\*\*** Includes the first chapter (sneak peek) of *Flames of Love* (The Remingtons) STROKE OF LOVE is part of the *Love in Bloom* series. Alexander the Great Thomas R. Martin 2012-09-28 Everything we know about Alexander comes from ancient sources, which agree unanimously that he was extraordinary and greater than everyday mortals. From his birth into a hypercompetitive world of royal women through his training under the eyes and fists of stern soldiers and the piercing intellect of Aristotle; through friendships, rivalries, conquests and negotiations; through acts of generosity and acts of murder, this book explains who Alexander was, what motivated him, where he succeeded (in his own eyes) and where he failed, and how he believed that he earned a new 'mixed' nature combining the human and the divine. This book explains what made Alexander 'Great' according to the people and expectations of his time and place and rejects modern judgments asserted on the basis of an implicit moral superiority to antiquity.

**Active Solar Systems** George O. G. Löf 1993 Active Solar Systems is volume 6 in a series that surveys advances in solar energy research since the oil shock of the early 1970s. Books in the series document in particular the period 1973 to 1985, which spawned a rich array of federally financed technological programs and developments facilitating the practical use of solar energy. The twenty-two contributions in Active Solar Systems introduce design, analysis, and control methods for active systems and cover advances in the interconnected technologies for water heating, space heating, and space cooling. They show that, with effective marketing and with environmental costs factored into individual consumer decisions, there is strong potential for solar water heating and space heating, and that solar cooling has potential but needs further development to become commercially viable. The details of the materials involved in these technologies are covered in volume 5, Solar Collectors, Energy Storage, and Materials. George Löf is Professor Emeritus and Senior Advisor in the Solar Energy Applications Laboratory at Colorado State University.
