[A Philosophy of Textile](#) Catherine Dormor 2020-12-10 Textile is at once a language, a concept and a material thing. Philosophers such as Plato, Deleuze and Derrida have notably drawn on weaving processes to illustrate their ideas, and artists such as Ann Hamilton, Louise Bourgeois and Chiharu Shiota explore matters such as the seam, the needle and thread, and the flow of viscous materials in their work. Yet thinking about textile and making textile are often treated as separate and distinct practices, rather than parallel modes. This beautifully illustrated book brings together for the first time the language and materiality of textile to develop new models of thinking, writing and making. Through the work of thinkers such as Roland Barthes, Hélène Cixous and Luce Irigaray, and international artists like Eva Hesse and Helen Chadwick, textile practitioner, theorist and writer Catherine Dormor puts forward a new philosophy of textile. Exploring the material behaviours and philosophical language of folding, shimmering, seaming, viscosity, fraying and caressing, Dormor demonstrates how textile practice and theory are intricately woven together.

[How to Build a Bobber on a Budget](#) Jose de Miguel 2008-02-15 In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute moteur Gucci choppers, the true custom bike has gotten out of most riders' reach, right? Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the-mill custom build into a drop-dead show stopper. Following de Miguel's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.
