Code of the Street: Decency, Violence, and the Moral Life of the Inner City - Elijah Anderson
2000-09-17

Unsparring and important. . . . An informative, clearheaded and sobering book.—Jonathan Yardley, Washington Post (1999 Critic's Choice)
Inner-city black America is often stereotyped as a place of random violence, but in fact, violence in the inner city is regulated through an informal but well-known code of the street. This unwritten set of rules—based largely on an individual's ability to command respect—is a powerful and pervasive form of etiquette, governing the way in which people learn to negotiate public spaces. Elijah Anderson's incisive book delineates the code and examines it as a response to the lack of jobs that pay a living wage, to the stigma of race, to rampant drug use, to alienation and lack of hope.

Sociology Beyond Societies - John Urry
2012-11-12

In this ground-breaking contribution to social theory, John Urry argues that the traditional

basis of sociology - the study of society - is outmoded in an increasingly borderless world. If sociology is to make a pertinent contribution to the post societal era it must forget the social rigidities of the pre-global order and, instead, switch its focus to the study of both physical and virtual movement. In considering this sociology of mobilities, the book concerns itself with the travels of people, ideas, images, messages, waste products and money across international borders, and the implications these mobilities have to our experiences of time, space, dwelling and citizenship. *Sociology Beyond Society* extends recent debate about globalisation both by providing an analysis of how mobilities reconstitute social life in uneven and complex ways, and by arguing for the significance of objects, senses, and time and space in the theorising of contemporary life. This book will be essential reading for undergraduates and graduates studying sociology and cultural geography.

Anthropology and Global Counterinsurgency - John D. Kelly 2010-04-15

Global events of the early twenty-first century have placed new stress on the relationship among anthropology, governance, and war. Facing prolonged insurgency, segments of the U.S. military have taken a new interest in anthropology, prompting intense ethical and scholarly debate. Inspired by these issues, the essays in *Anthropology and Global Counterinsurgency* consider how anthropologists can, should, and do respond to military overtures, and they articulate anthropological perspectives on global war and power relations. This book investigates the shifting boundaries between military and civil state violence; perceptions and effects of American power around the globe; the history of counterinsurgency doctrine and practice; and debate over culture, knowledge, and conscience in counterinsurgency. These wide-ranging essays shed new light on the fraught world of Pax Americana and on the ethical and political dilemmas faced by anthropologists and military personnel alike when attempting to understand and intervene in our world.

World Social Report 2020 - Department of Economic and Social Affairs 2020-02-14
This report examines the links between

inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

The Social Construction of Reality - Peter L. Berger 2011-04-26

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

Urban Socio-Economic Segregation and Income Inequality - Maarten van Ham 2021-03-29

This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a

result, the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

Thinking Skills - John Butterworth 2013-04-18
Thinking Skills, second edition, is the only endorsed book offering complete coverage of the Cambridge International AS and A Level syllabus.

Practical Research - Paul D. Leedy 2013-07-30
For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

Cape Law - Veronica E. Bailey 2016-01-06
This book is written to give coverage to the Caribbean Advanced Proficiency Examination Syllabus on Law Unit 2. It provides concise access to topics that are relevant to this unit while providing a brief look at relevant cases that support principles and substantive law encountered throughout the text.

What is Gender? - Mary Holmes 2007-06-18
Is gender something done to us by society, or something we do? What is the relationship between gender and other inequalities? What is Gender? explores these complex and important questions, helping readers to critically analyse how women's and men's lives are shaped by the society in which they live. The book offers a comprehensive account of trends in sociological thinking, from a material and economic focus on gender inequalities to the debates about

meaning initiated by the linguistic or cultural turn. The book begins by questioning simplistic biological conceptions of gender and goes on to evaluate different theoretical frameworks for explaining gender, as well as political approaches to gender issues. The cultural turn is also examined in relation to thinking about how gender is related to other forms of inequality such as class and 'race'. The book is up-to-date and broad in its scope, drawing on a range of disciplines, such as: sociology, psychoanalysis, masculinity studies, literary criticism, feminist political theory, feminist philosophy and feminist theory.

Dynamic Sociology - Lester Frank Ward 1915

Public Sociology - Michael Burawoy 2021-09-08
Michael Burawoy has helped to reshape the theory and practice of sociology across the Western world. Public Sociology is his most thoroughgoing attempt to explore what a truly committed, engaged sociology should look like in the twenty-first century. Burawoy looks back on the defining moments of his intellectual journey, exploring his pivotal early experiences as a researcher, such as his fieldwork in a Zambian copper mine and a Chicago factory. He recounts his time as a graduate and professor during the ideological ferment in sociology departments of the 1970s, and explores how his experiences intersected with a changing political and intellectual world up to the present. Recalling Max Weber, Burawoy argues that sociology is much more than just a discipline - it is a vocation, to be practiced everywhere and by everyone.

CAPE Accounting Unit 2 - Sylvan James 2019-10-05

This book is primarily intended for anyone taking the Caribbean Advance Proficiency Examinations in Accounting Unit 2, Paper 1. It will also be useful for those who are studying for other Multiple Choice Examinations in Cost and Management Accounting at an Intermediate Level. The book contains over 450 questions arranged into eleven chapters, each covering a different section and topic of the Syllabus. The questions are structured to increase your understanding and give you an opportunity to apply the accounting concepts you have learnt.

It will also provide valuable familiarity with the type of questions you are likely to encounter in the examination. The book is meant to be used along with a textbook. I recommend the use of the CAPE Accounting Unit Two, Study Guide, since the chapter headings are similar to the topical headings in this book. The book will also be useful for revision.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation - Christopher B. Field 2012-05-28

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Caribbean Sociology - Rhoda Reddock 2001
A significant body of Caribbean sociological literature is either scattered, difficult to access, or out of print. This publication addresses this problem by bringing the literature together in a single volume. This comprehensive collection is divided into twelve sections, beginning with a general introduction that reviews Caribbean sociological development. The subsequent sections explore the themes of Caribbean social theory, social stratification, ethnicity, culture and identities, women and gender, education, and modernization, as well as emerging topics of discussion, namely domestic violence, child and sexual abuse, labor market conditions, population and demographic change and indigenous African-derived religions. Christine Barrow is a lecturer in sociology at the University of the West Indies in Barbados. Rhoda Reddock, University of the West Indies, is head of the Center for Gender and Development Studies in St. Augustine, Trinidad.

Publisher Description

The Technological Society - Jacques Ellul
2021-07-27

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process."—Harper's "One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul

convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs.”—The Nation “A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance.”—Los Angeles Free Press
Sociology for Caribbean Students - 2nd Edn - Nasser Mustapha 2013-08-01

In this second edition of *Sociology for Caribbean Students*, author Nasser Mustapha builds on the success of the earlier volume by continuing to demystify the science of Sociology for the introductory student. This text also stays true to the aims of the first edition by incorporating the perspective of the Caribbean and developing societies within the concepts and theories of Sociology. Fully up to date and in line with the requirements of the Caribbean Advanced Proficiency Examination (CAPE(r)) Sociology Syllabus, *Sociology for Caribbean Students* is divided into two major Units with three modules each. Topics such as the Family, Culture and Identity, Religion, Population Theories and Institutions of Social Control are explained in a student-friendly manner which speaks to the Caribbean reality. The book has been significantly revised to include new activities, data and exercises to clarify concepts and theories which may be difficult to grasp for the beginner in Sociology; and will thereby remain the preferred text for student

Answers to the chapter exercises and multiple-choice questions are available download in the 'Samples and Resources' section of the website.

Poverty and Social Exclusion in India - 2011-01-01

Despite India's record of rapid economic growth and poverty reduction over recent decades, rising inequality in the country has been a subject of concern among policy makers, academics, and activists alike. *Poverty and Social Exclusion in India* focuses on social exclusion, which has its roots in India's historical divisions along lines of caste, tribe, and the excluded sex, that is, women. These inequalities are more structural in nature and have kept entire groups trapped, unable to take advantage of opportunities that economic growth offers. Culturally rooted systems perpetuate inequality, and, rather than a culture of poverty that afflicts disadvantaged groups, it is, in fact, these inequality traps that prevent these groups from breaking out. Combining rigorous quantitative research with a discussion of these underlying processes, this book finds that exclusion can be explained by inequality in opportunities, inequality in access to markets, and inequality in voice and agency. This report will be of interest to policy makers, development practitioners, social scientists, and academics working to foster equality in India.

Pedagogy of the Oppressed - Paulo Freire 1972

A Handbook for the Study of Mental Health - Teresa L. Scheid 2010

The second edition of *A Handbook for the Study of Mental Health* provides a comprehensive review of the sociology of mental health.

Chapters by leading scholars and researchers present an overview of historical, social and institutional frameworks. Part I examines social factors that shape psychiatric diagnosis and the measurement of mental health and illness, theories that explain the definition and treatment of mental disorders and cultural variability. Part II investigates effects of social context, considering class, gender, race and age, and the critical role played by stress, marriage, work and social support. Part III focuses on the organization, delivery and evaluation of mental health services, including the criminalization of mental illness, the challenges posed by HIV, and the importance of stigma. This is a key research reference source that will be useful to both undergraduates and graduate students studying mental health and illness from any number of disciplines.

In addition the course offers valuable advice to help build applicants' confidence. "

Approaches to Class Analysis - Erik Olin Wright 2005-07-01

Few themes have been as central to sociology as 'class' and yet class remains a perpetually contested idea. Sociologists disagree not only on how best to define the concept of class but on its general role in social theory and indeed on its continued relevance to the sociological analysis of contemporary society. Some people believe that classes have largely dissolved in contemporary societies; others believe class remains one of the fundamental forms of social inequality and social power. Some see class as a narrow economic phenomenon whilst others adopt an expansive conception that includes cultural dimensions as well as economic conditions. This 2005 book explores the theoretical foundations of six major perspectives of class with each chapter written by an expert in the field. It concludes with a conceptual map of these alternative approaches by posing the question: 'If class is the answer, what is the question?'

Population - John Robert Weeks 1994
Includes bibliographical references and index.
Sociology - John J. Macionis 1998

The main focus of this sociology text is the UK, Europe and North America. A recurrent theme throughout is that the modern world is becoming progressively globalized, and that it is therefore increasingly impossible to understand one country in isolation from another. The student is also encouraged to engage with the subject through such features as opening vignettes and critical thinking questions.

Marine Fisheries Review - 1973
