Crisis in the Red Zone - Richard Preston
2020-04-03

NEW YORK TIMES BESTSELLER • An urgent wake-up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us, told through the story of the deadly 2013–2014 Ebola epidemic “Crisis in the Red Zone reads like a thriller. That the story it tells is all true makes it all more terrifying.”—Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction* From the #1 bestselling author of *The Hot Zone*, now a National Geographic original miniseries . . . This time, Ebola started with a two-year-old child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end—as the virus mutated into its deadliest form, and spread farther and faster than ever before—30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the pandemic, in which we saw for the first time the specter of Ebola jumping continents, crossing the Atlantic, and infecting people in America. Rich in characters and conflict—physical, emotional, and ethical—Crisis in the Red Zone is an immersion in one of the great public health calamities of our time. Preston writes of doctors

and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. Crisis in the Red Zone makes clear that the outbreak of 2013–2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined—in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. Crisis in the Red Zone is an exquisitely timely book, a stark warning of viral outbreaks to come.

[The End of Dieting](#) - Dr. Joel Fuhrman
2014-04-28

We're fatter, sicker and hungrier than ever, and the diet industry - with its trendy weight-loss protocols and eat-this-not that ratios of fat, carbs and protein - offers only temporary short-term solutions at the expense of our permanent long-term health. As a result, we're trapped in a cycle of food addiction, toxic hunger and overeating. In *The End of Dieting*, Dr Joel Fuhrman, a doctor

and the New York Times bestselling author of *Eat to Live* and *The End of Diabetes*, shows us how to break free from this vicious cycle once and for all. Dr Fuhrman lays out in full all the dietary and nutritional advice necessary to eat our way to a healthier and happier life. At the centre of his revolutionary plan is his trademark health formula: Health = Nutrients/Calories. Foods high in nutrient density, according to Dr Fuhrman, are more satisfying than foods high in calories. They eliminate our cravings for fat, sweets and carbs. The more nutrient-dense food we consume, the more our bodies can function as the self-healing machines they're designed to be. Weight will drop, diseases can reverse course and disappear and overall our lives can be longer and healthier. The core of *The End of Dieting* is an easy to follow programme that kickstarts your new life outside of the diet mill: • Simple meals for 10 days, to retrain your taste buds and detox • Gourmet flavourful recipes • A two-week programme, to flood your body with nutrients *The End of Dieting* is the book we have been waiting for - a proven, effective and sustainable approach to eating that lets us prevent and reverse disease, lose weight and reclaim our right to excellent health.

Super Immunity - Joel Fuhrman 2011-09-20

Why do some of us get sick with greater frequency than others? What makes us more susceptible to illness? Are we doomed to get sick when our coworkers and family members do? Is there a secret to staying healthy? Joel Fuhrman, M.D., a leading expert and board-certified medical specialist in prevention and reversing disease, offers a comprehensive guide to superior health. Based on the latest scientific research, *Super Immunity* shows us how we can become almost totally resistant to colds, influenza, and other infections. The evidence is overwhelming: we can supercharge our immune system to protect our bodies against disease—everything from the common cold to cancer. Nutritional science has made phenomenal strides and discoveries in recent years, and when this new research is applied it enables us to seize control of our health like never before. Dr. Fuhrman explains this new science, providing everything you need to know to put this knowledge into action in your kitchen and in your life. What we eat has everything to

do with our health, and, unfortunately, too many of us are living with a severely depleted immune function. Our dietary choices are making us sicker, shortening our lives, and costing us billions of dollars in doctor visits, hospital stays, and prescription medications. But Dr. Fuhrman doesn't believe more medical care is the answer. Rather, he explains the solution is to change the way we eat. The standard American diet is nutrient deficient. We are eating too many highly processed foods, foods with added sweeteners, and animal fats and protein. At the same time, we are not eating enough fruits, beans, seeds, and vegetables, which leaves us lacking in hundreds of the most important immune-building compounds. By changing our diets and combining foods that contain powerful immune-strengthening capabilities, we can prevent most common modern diseases. Combining the latest data from clinical tests, nutritional research, and results from thousands of patients, Dr. Fuhrman proves that super immunity exists and is well within reach for those who choose it. We all have the ability to live healthier, stronger, and longer than ever before. Isn't it time you discovered super immunity?

Eat to Beat Disease - William W Li 2019-03-19

Eat your way to better health with this New York Times bestseller on food's ability to help the body heal itself from cancer, dementia, and dozens of other avoidable diseases. Forget everything you think you know about your body and food, and discover the new science of how the body heals itself. Learn how to identify the strategies and dosages for using food to transform your resilience and health in *Eat to Beat Disease*. We have radically underestimated our body's power to transform and restore our health. Pioneering physician scientist, Dr. William Li, empowers readers by showing them the evidence behind over 200 health-boosting foods that can starve cancer, reduce your risk of dementia, and beat dozens of avoidable diseases. *Eat to Beat Disease* isn't about what foods to avoid, but rather is a life-changing guide to the hundreds of healing foods to add to your meals that support the body's defense systems, including: Plums Cinnamon Jasmine tea Red wine and beer Black Beans San Marzano tomatoes Olive oil Pacific oysters Cheeses like

Jarlsberg, Camembert and cheddar Sourdough bread The book's plan shows you how to integrate the foods you already love into any diet or health plan to activate your body's health defense systems-Angiogenesis, Regeneration, Microbiome, DNA Protection, and Immunity-to fight cancer, diabetes, cardiovascular, neurodegenerative autoimmune diseases, and other debilitating conditions. Both informative and practical, Eat to Beat Disease explains the science of healing and prevention, the strategies for using food to actively transform health, and points the science of wellbeing and disease prevention in an exhilarating new direction.

Food Matters - Mark Bittman 2008-12-30

From the award-winning champion of culinary simplicity who gave us the bestselling How to Cook Everything and How to Cook Everything Vegetarian comes Food Matters, a plan for responsible eating that's as good for the planet as it is for your weight and your health. We are finally starting to acknowledge the threat carbon emissions pose to our ozone layer, but few people have focused on the extent to which our consumption of meat contributes to global warming. Think about it this way: In terms of energy consumption, serving a typical family-of-four steak dinner is the rough equivalent of driving around in an SUV for three hours while leaving all the lights on at home. Bittman offers a no-nonsense rundown on how government policy, big business marketing, and global economics influence what we choose to put on the table each evening. He demystifies

buzzwords like "organic," "sustainable," and "local" and offers straightforward, budget-conscious advice that will help you make small changes that will shrink your carbon footprint -- and your waistline. Flexible, simple, and non-doctrinaire, the plan is based on hard science but gives you plenty of leeway to tailor your food choices to your lifestyle, schedule, and level of commitment. Bittman, a food writer who loves to eat and eats out frequently, lost thirty-five pounds and saw marked improvement in his blood levels by simply cutting meat and processed foods out of two of his three daily meals. But the simple truth, as he points out, is that as long as you eat more vegetables and whole grains, the result will be better health for you and for the world in which we live. Unlike most things that are virtuous and healthful, Bittman's plan doesn't involve sacrifice. From Spinach and Sweet Potato Salad with Warm Bacon Dressing to Breakfast Bread Pudding, the recipes in Food Matters are flavorful and sophisticated. A month's worth of meal plans shows you how Bittman chooses to eat and offers proof of how satisfying a mindful and responsible diet can be. Cheaper, healthier, and socially sound, Food Matters represents the future of American eating.

Fast Food Genocide - Joel Fuhrman, M.D.
2017-10-17

From the #1 New York Times bestselling author of Eat to Live and The End of Diabetes, an unflinching, provocative exploration of how our food is killing us and the ways in which we are unwitting participants in an unprecedented and exploding health crisis. Fast food is far more than just the burgers, fries, and burritos served at chain restaurants; it is also the toxic, human-engineered products found in every grocery store across America. These include: cold breakfast cereals; commercial and preserved (deli) meats and cheeses; sandwich breads and buns; chips, pretzels, and crackers; fried foods; energy bars; and soft drinks. Fast foods have become the primary source of calories in the United States and consequently the most far-reaching and destructive influence on our population. The indisputable truth is that our highly processed diet is the source of a national health crisis that is exploding into a genocide with unseen tragic implications. Heart attacks,

strokes, cancer, obesity, ADHD, autism, allergies, and autoimmune diseases all have the same root cause – our addiction to toxic ingredients. New York Times bestselling author, board-certified physician, nutritional researcher, and leading voice in the health field Joel Fuhrman, M.D., explains why the problem of poor nutrition is deeper, more serious, and more pervasive than anyone imagined. *Fast Food Genocide* draws on twenty-five years of clinical experience and research to confront our fundamental beliefs about the impact of what we eat. This book identifies issues at the heart of our country's most urgent problems. Fast food kills, but it also perpetuates bigotry and derails the American dream of equal opportunity and happiness for all. It leaves behind a wake of destruction creating millions of medically dependent and sickly people burdened with poor-quality lives. The solution hiding in plain sight – a nutrient-dense healthful diet – can save lives and enable humans to reach their intellectual potential and achieve successful and fulfilling lives. Dr. Fuhrman offers a life-changing, scientifically sound approach that can alter American history and perhaps save your life in the process.

Eat to Live - Joel Fuhrman 2011-01-05

The healthy diet plan that's become a million-copy word-of-mouth bestseller -- now completely revised and updated. Hailed a "medical breakthrough" by Dr. Mehmet Oz, *Eat to Live* offers a highly effective, scientifically proven way to lose weight quickly. The key to Dr. Joel Fuhrman's revolutionary six-week plan is simple: health = nutrients / calories. When the ratio of nutrients to calories in the food you eat is high, you lose weight. The more nutrient-dense food you eat, the less you crave fat, sweets, and high-caloric foods. *Eat to Live* has been revised to include inspiring success stories from people who have used the program to lose shocking amounts of weight and recover from life-threatening illnesses; Dr. Fuhrman's nutrient density index; up-to-date scientific research supporting the principles behind Dr. Fuhrman's plan; new recipes and meal ideas; and much more. This easy-to-follow, nutritionally sound diet can help anyone shed pounds quickly-and keep them off.

The End of Heart Disease - Joel Fuhrman, M.D. 2016-04-05

The New York Times bestselling author of *Eat to Live*, *Super Immunity*, *The End of Diabetes*, and *The End of Dieting* presents a scientifically proven, practical program to prevent and reverse heart disease, the leading cause of death in America—coinciding with the author's new medical study revealing headline-making findings. Dr. Joel Fuhrman, one of the country's leading experts on preventative medicine, offers his science-backed nutritional plan that

addresses the leading cause of death in America: heart disease. An expert in the science of food, Dr. Fuhrman speaks directly to readers who want to take control of their health and avoid taking medication or undergoing complicated, expensive surgery, the two standard treatments prescribed today. Following the model of his previous programs that have successfully tackled conditions from diabetes to dieting, Dr. Fuhrman's plan begins with the food we eat. He focuses on a high nutrient per calorie ratio, with a range of options for different needs and conditions. He shows us what to remove and what to add to our diets for optimum heart health, provides menu plans and recipes for heart-healthy meals and snacks, and includes helpful questions for doctors and patients. By understanding heart disease and its triggers, Dr. Fuhrman gives us the knowledge to counter-attack this widespread epidemic and lead longer, healthier lives.

His nutrient-rich eating plan can have a significant impact on your child's resistance to dangerous infections, and a dramatic effect on reducing the occurrence of illnesses like asthma, ear infections, and allergies. Dr. Fuhrman explains how you can make sure your children are eating right to maintain a healthy mind and body, and how eating certain foods and avoiding others can positively impact your child's IQ and success in school. He also presents the fascinating science that demonstrates that the current epidemic of adult cancers and other diseases is closely linked to what we eat in the first quarter of life. Eating well in our early years may enable us to win the war on cancer. Bolstered by this scientific evidence, he helps you do everything you can to protect your child against developing diabetes, cardiovascular disease, autoimmune diseases, and cancer through a solid nutritional groundwork.

IMMUNITY STRONG - Robert G. Lahita
2021-11-09

There is a biological force within the body that wants you to live to old age. While conventionally this force is known in medicine as the immune system, Dr. Bob calls it: "The Biological Soul." The Biological Soul is designed to protect you and allow you to live a healthy life. This force is tangible, measurable, lives within the physical body and determines our age and wellbeing through life. It is physical and complex and, in many ways, spiritual. It is affected by life's stresses, by diets, and by overall health and though not immortal; it both shapes your life and your life shapes it.

IMMUNITY STRONG walks readers through how the immune system works, what makes it implode or keeps it safe and what modern science reveals about how it connects to every part of the body to keep it alive—as the seat of our “Biological Soul.” Written in Dr. Bob’s trademark down-to earth style, the book explains that the normal immune system functions like a police department protecting the body from harm. While as a nation we have recently been focused on the effects of infections, the book reveals that it is important to note that disorders of immunity are at the root of most diseases that shorten or impact our lives. From chronic pain and fatigue syndromes, heart disease and clogged arteries and even the ability to recognize and destroy cancer, to multiple sclerosis, lupus, celiac disease, rheumatoid arthritis and autoimmune disorders are all linked to one or another glitch in the immune system. The purpose of this book is to provide significant information on the incredible complexity of the immune system and how the integration of spiritual, scientific, and emotional values can enhance health. It is Dr. Bob’s hope that readers will find a new appreciation of the miracle that is the physical body and to understand the potential within our Biological Soul to promote longevity and overall happiness to life. IMMUNITY STRONG: Boost Your Body's Natural Healing Power and Live to 100 is a must-read for anyone wishing to nurture and enhance their health.

Handbook of Nutrition and Immunity - M. Eric Gershwin 2004-06-04

Several years ago, two of us published a full-length textbook entitled Nutrition and Immunology: Principles and Practice. The book was academically successful and well received by our peers. Our colleagues commented that while the book was eminently suitable for a library, there was still an intellectual need for a more concise volume on nutrition and immunology for health care providers and scientists working at the inter face of delivering therapeutic and/or preventive health care. We agreed and decided that a book focused on issues relevant to laboratory workers and to developing countries would be valuable. We invited well-known experts in their fields to contribute a chapter each and asked that they

err on the short rather than the long side and update cited review articles rather than original papers wherever possible. The Handbook of Nutrition and Immunity is the culmination of that process. Our intention is that the book will grow over time and new editions will fill identified voids that meet the changing needs of health care providers and scientists interested in the practical aspects related to evaluating nutrition and immunology in the field. The Handbook of Nutrition and Immunity is for those people working in both adult and child nutrition throughout the world. It is also of relevance to those in the pharmaceutical and the food industry who are interested in developing ways to evaluate both the efficacy and effectiveness of their products.

Eat for Life - Joel Fuhrman, M.D. 2020-03-03
NEW YORK TIMES BESTSELLER As Featured on PBS How to stay healthy and boost immunity with #1 New York Times bestselling author Dr. Joel Fuhrman's no-nonsense, results-driven nutrition plan. As a family physician for over 30 years and #1 New York Times bestselling author Joel Fuhrman, M.D. will tell you that doctors and medications cannot grant you excellent health or protection from disease and suffering. The most effective health-care is proper self-care and that starts with changing the way we eat. Eat for Life delivers a science-backed nutrition-based program that prevents and even reverses most medical problems within three to six months. This is a bold claim but the science and the tens of thousands who have tried this approach back it up. The truth is: you simply do not have to be sick. Most Americans are deficient in the vitamins, minerals and phytonutrients found in plants (micronutrients), and consume too many fats, proteins, carbohydrates (macronutrients). The results of this standard diet is that we are not only shortening our lives but damaging our energy, vitality, and daily health by eating packaged and processed foods, excessive meat and dairy, and unsustainable amounts of salt and sugar. What we need is to consume foods rich in phytonutrients such as greens, beans, onions, mushrooms, berries, and seeds. These delicious and abundant foods contain the largest assortment of micronutrients and when consumed in adequate quantities they prevent and reverse diabetes and heart-disease, lower

cholesterol and blood pressure, and reduce hunger and food cravings. Rooted in the latest nutritional science and complete with recipes, menu plans, and testimonials, Eat for Life offers everything you need to change the course of your health and put this life-changing program to work for you.

Clean (Enhanced Edition) - Alejandro Junger
2010-12-28

This book is enhanced with content such as audio or video, resulting in a large file that may take longer to download than expected. This enhanced edition of Clean includes extra audio, video and recipes. In Clean, a New York City cardiologist and a leader in the field of integrative medicine, Dr. Alejandro Junger, offers a major medical breakthrough. Dr. Junger argues that the majority of common ailments are the direct result of toxic build-up in our systems accumulated through the course of our daily lives. As the toxicity of modern life increases and disrupts our systems on a daily basis, bombarding us through our standard American diet and chemical-filled environments, our ability to handle the load hasn't accelerated at the same rapid pace. The toxins are unavoidable but Clean offers a solution.

The Doctor's Kidney Diets - Mandip S. Kang, MD 2016-01-05

* Winner of the IBPA Benjamin Franklin Award for Best Health Title In the United States alone, 26 million adults have chronic kidney disease (CKD), and experts project that over half the country may develop CKD due to rising rates of disorders such as diabetes. While nephrologists can monitor kidney function and treat patients with medications, they can't always offer the nutritional guidance that every kidney patient requires. To fill this information gap, Dr. Mandip Kang has written The Doctor's Kidney Diets, a comprehensive guide to managing, slowing down, and even stopping the progression of CKD through diet. The book is divided into two parts.

Part One provides a clear overview of kidney function, kidney disease, and the role that nutrition plays in the treatment of kidney problems. The doctor then reviews the special dietary considerations of individuals with CKD, including the need to limit certain nutrients, fluids, and other dietary components. Because different patients have different nutritional requirements, the doctor discusses the most commonly prescribed CKD diets—the DASH diet, heart disease and diabetes diets, diets for dialysis, and more—and concludes with important tips for enhancing overall health and maximizing treatment success. Then Part Two offers a wide variety of recipes for dishes that follow the dietary guidelines highlighted in Part One. Smart nutrition is essential to the treatment of kidney disease. With *The Doctor's Kidney Diets*, you can become an active, effective participant in your own treatment plan.

[Reversing Diabetes in 21 Days](#) - Nandita Shah 2017-11-23

A twenty-one-day challenge is all it takes to get on the path of reversing diabetes. Sounds unbelievable? It's true. Based on her revolutionary diabetes reversal programme, Dr Nandita Shah, renowned homeopath and founder-director of SHARAN, elaborately breaks down the real cause of diabetes using scientific

evidence and intelligently outlines a routine that will not just prevent the disease but also reverse it. By addressing the cause of insulin resistance and lack of insulin, *Reversing Diabetes in 21 Days* provides a fresh and practical perspective on how to cure diabetes. This book carefully takes into account the Indian context, customs, tastes and thought processes to tailor the best possible step-by-step guide that an average Indian can follow. Interspersed with testimonials, stories and real-life experiences of past participants, this book will show you that type 2 diabetes and many cases of type 1 diabetes are indeed reversible!

Power Up Your Brain - David Perlmutter, M.D./F.A.C.N 2011-02-01

The quest for enlightenment has occupied mankind for millennia. And from the depictions we've seen—monks sitting on meditation cushions, nuns kneeling in prayer, shamans communing with the universe—it seems that this elusive state is reserved for a chosen few. But now, neuroscientist David Perlmutter and medical anthropologist and shaman Alberto Villoldo have come together to explore the commonalities between their specialties with the aim of making enlightenment possible for anyone. Joining the long-separated worlds of science and spirit, Perlmutter explores the exciting phenomena of neurogenesis and mitochondrial health, while Villoldo brings his vast knowledge of shamanic and spiritual practices to the table. Together they draw from the most powerful tools in each discipline to create the *Power Up Your Brain* program, a ground-breaking, five-week plan that helps prime the brain for enlightenment. With nutritional advice, dietary supplements, physical exercise, shamanic practices, meditation, and visualizations, Perlmutter and Villoldo guide

readers, step by step, through a program to help them clear their minds from previous trauma and open themselves up to experience the inner peace, vast insight, and extraordinary creativity that define the experience of enlightenment, paving the way to successfully face the challenges to come.
