Ertl Toy Tractors - Patrick Ertl 2004

In more than one respect, Ertl, long the most celebrated name in diecast toy tractors, is much like Tonka: both were founded shortly after World War II in the basements of enterprising Midwesterners. Although Ertl, also like Tonka, has produced countless toy trucks, this book will focus solely on the Iowa toymaker's true bread and butter: toy tractors produced from 1945 to present. Two hundred color photos depict Ertl's 1/16- and 1/64-scale tractors, up close with theater-gel backgrounds, diecast implements, and the sort of plastic injection-molded farmers

and livestock with which Ertl has often packaged its tractors. Accompanying the is the story of how this Dyersville-based company grew by leaps and bounds, including founder Fred Ertl's first licensing of some of these companies' names and actual designs in 1945 , the family-based assembly line he and his wife established in their home, Ertl's renowned commitment to quality, and the incredible detail that goes into today's precision-made scale models.- Most collectible toy tractors available today are produced by Ertl- The truly American story of how an unemployed immigrant foundryman licensed the designs of ag giants I-H and J-D, melted surplus aluminum aircraft pistons in his basement furnace, poured the slag into hand-made sand molds, and put his five sons to work assembling and painting the tractors at the kitchen table- New 1/16 scale Ertl tractors typically sell in the \$60 price range; most highly collectible vintage examples in the mid-three-figure range- WalMart is the #1 customer;

followed by Farm & Fleet- Ertl, celebrating its 60th Anniversary, is the 900 pound gorilla in this category. About the Author Patrick Ertl is the publisher for Antique Power magazine.

Catherine Lee Phillips provided the photography for the book. They both live in Yellow Springs, Ohio.

National Safety Tractor and Machinery

Operation Program Student Manual - Ohio State University 2006-06-30

The need for current and better quality training materials was cited by both certification program instructors and coordinators. In recognition of these shortcomings, the U. S. Department of Agriculture (USDA) funded a major project with Penn State University, The Ohio State University, and the National Safety Council to develop a National Safe Tractor and Machinery Operation Program (NSTMOP). The result is the NSTMOP Student Manual. This manual, including the task sheets, is the primary curriculum resource developed and designed to be used in a variety of instructional settings. The task sheets are divided into 6 sections: introduction; safety basics; agricultural hazards; the tractor; connecting and using implements with the tractor; and material handling (skid steers, ATV, and utility vehicles). There are a total of 77 task sheets, 48 are identified as core topics. Also included are a skills and driving test

layout map and evaluation forms.

Compact Utility Tractors - Dennis David

2013-06-01

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the

Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.
