Freshwater Aquarium Fish Care for Beginners: A Quick Start Guide to Freshwater Fish and Freshwater Aquarium Care for Happy & Healthy Pet Fish - Nancy

Copeland, Malibu Publishing
2013-04-24

It's amazing how much conversation can take place between a two-year old and an aquarium. Let the kids name the fish. Have discussions and ask questions like, what color

is that fish? What are the fish doing today? Count the fish. Just be careful with counting. If one of the fish has decided to eat some of its tank mates that could turn into a different type of learning experience altogether. This doesn't necessarily have to be a bad thing; you just have to be prepared for it. After all, kids do have to learn about the cycle of life and death somehow. It would certainly be a lot easier to cope with the death of goldfish as a child's first loss, rather than a human family member. In these times of having five hundred plus cable channels and excessive video games, an aquarium can be a refreshing touch to a home. The next time you sit down for a family dinner; try looking at the aquarium instead of the television. You never know, it may just start an actual conversation.

And Novices - Dr Patrick Elliot

There are many varieties of nitrifying bacteria in nature.

Some types live in freshwater, some in saltwater and others live in both! Nitrifiers can be found in garden soil, on pebbles in a stream, living ocean sediment and in sewage treatment plants. They're almost everywhere, even in water vapor floating through the air. In the early days of fish keeping, no one knew anything about nitrifying bacteria or biological filtration. People added a layer of soil, pebbles and live plants when they started a new tank. Nitrifying bacteria were carried into the aquarium on all these aquascaping materials and even on the live plants and fish. This helped "seed" the new aquarium with bacteria, starting-up the biological filter. Keep in mind that no one knew about ammonia and nitrite toxicity. They didn't even have aquarium test kits to check on the water quality.
