The Search For Dale's Plane - Fran Phillips 2015-01-05
The Search for Dale's Plane is a true storythat began on December 1, 2013 when Alaska bush pilot,Dellon Smith, set out to find his brother's plane after it dropped off the radar over remote Idaho. Aided by family members from seven states and his brother's church congregation, they encountered impossible weather conditions, impenetrably steep mountains, and the complete loss of clues.

Going home for Christmas, they returned with a new perspective and resources. With bleary eyes, physical exhaustion, humility, and prayers, thousands volunteered and miracles happened. The search wasn't just about finding the plane as many discovered a richer, more fulfilling life. Sharing their feelings and experiences, this book promises to uplift and leave you warmed by the love our Heavenly Father shows during periods of adversity and

by the faith, dignity and courage exhibited by Janis, the wife of the pilot, and other family members as they waited in limbo with hope in their hearts.

2009-11-11

By the dawn of the new millennium, robotics has undergone a major transformation in scope and dimensions. This expansion has been brought about by the maturity of the field and the advances in its related technologies. From a largely dominant industrial focus, robotics has been rapidly expanding into the challenges of the human world. The new generation of robots is expected to safely and dependably co-habitat with humans in homes, workplaces, and communities, providing support in services, entertainment, education, healthcare, manufacturing, and assistance. Beyond its impact on physical robots, the body of

knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The goal of the series of Springer Tracts in Advanced Robotics (STAR) is to bring, in a timely fashion, the latest advances and developments in robotics on the basis of their significance and quality. It is our hope that the wider dissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing field.

State v. Gray - A. J. Bellido de Luna 2016-10-07

What is the appropriate response for officers to take when they believe they're in imminent mortal danger on the job? At what point does the use of force in an encounter diverge from being appropriate and justifiable, and cross into excessive and criminal? What does the law say about police shooting an unarmed citizen? These are the questions posed by State v. Gray, a new NITA case file inspired by the timely discussions our nation is having about the use of force against unarmed civilians. The

tragic events in Ferguson in 2014, Baltimore and Chicago in 2015, and Baton Rouge and Dallas in 2016—among far too many others throughout our nation in recent years—have energized the country in a debate about these very police tactics in America. State v. Gray is a fictionalized scenario that draws "inspiration" from real-life occurrences. Here, however, the issue of race is purposely avoided so the focus remains on whether the shooting of an unarmed individual is justified based on law. This well-balanced case file will challenge the student's advocacy and medical and forensic expert witness skills through this full trial, which includes four witnesses per side, including the experts in DNA evidence and gunshot residue collection and in police use of force. Students will prevail based entirely on their own prowess in advocacy and the way they use the abundance of evidence provided in the case file.

Dissecting the Hack: The F0rb1dd3n Network, Revised Edition - Jayson E Street
2010-08-06

Dissecting the Hack: The F0rb1dd3n Network, Revised Edition, deals with hackers and hacking. The book is divided into two parts. The first part, entitled "The F0rb1dd3n Network, tells the fictional story of Bob and Leon, two kids caught up in an adventure where they learn the real-world consequence of digital actions. The second part, "Security Threats Are Real (STAR), focuses on these real-world lessons. The F0rb1dd3n Network can be read as a stand-alone story or as an illustration of the issues described in STAR. Throughout The F0rb1dd3n Network are "Easter eggs —references, hints, phrases, and more that will lead readers to insights into hacker culture. Drawing on The F0rb1dd3n Network, STAR explains the various aspects of reconnaissance; the scanning phase of an attack; the attacker's search for network weaknesses and

vulnerabilities to exploit; the various angles of attack used by the characters in the story; basic methods of erasing information and obscuring an attacker's presence on a computer system; and the underlying hacking culture. Revised edition includes a completely NEW STAR Section (Part 2) Utilizes actual hacking and security tools in its story-helps to familiarize a newbie with the many devices and their code Introduces basic hacking techniques in real life context for ease of learning

The Second Time Around -

Chuck Dozier 2013-04-12

Book Description Second Time

Around This book depicts

marriage disappointments and

disillusions from a male

prospective. Most men are

fundamentally good and can

resist the temptations of

infidelity when given a choice.

The challenges of dealing with

a wife that constantly pushes

them to the margin of her life

can often be too much for some

men to bear. As a young man

right out of college, Norman,

was assigned by his company

to a territory in southern

Pennsylvania. While living

there Norman met Gail, an

attractive middle-aged woman

that was ten years his senior

with a teenage daughter. Gail

and Norman became

inseparable and very much in

love. Neither of them felt any

pressure to get married. After

six years Norman was

promoted and had to transfer

to another part of the country.

Fearing that their age

difference would cause their

relationship to fade, Gail opted

to stay in Pineville and they

drifted apart. Many years later

when their paths crossed again

Gail realized that she was still

in love with the man that she

had considered her soul mate.

However, Norman was now

married with two kids and

based in Seattle. His marriage

is unstable and Gail soon

realizes that there might be a

second chance to have the man

she has loved for nearly half

her life. With his judgment

clouded by the lack of attention

from his wife Norman begins to

feel that he might have chosen

the wrong woman for his life

partner.

chaos. Next, an ancient virus is

unleashed that steals death

from humanity. Bexar Reed and

his family, along with their

lifelong friends and fellow preppers, were prepared for the end of the world. They thought they were prepared for nearly every possibility—but they never thought the dead would rise to hunt the living. This edition features the previously published Winchester Over (Book One) and Winchester Prey (Book Two) in Dave Lund's Winchester Undead series.

Ecomedia - Stephen Rust
2015-09-07

Ecomedia: Key Issues is a comprehensive textbook introducing the burgeoning field of ecomedia studies to provide an overview of the interface between environmental issues and the media globally. Linking the world of media production, distribution, and consumption to environmental understandings, the book addresses ecological meanings encoded in media texts, the environmental impacts of media production, and the relationships between media and cultural perceptions of the environment. Each chapter

introduces a distinct type of media, addressing it in a theoretical overview before engaging with specific case studies. In this way, the book provides an accessible introduction to each form of media as well as a sophisticated analysis of relevant cases. The book includes contributions from a combination of new voices and well-established media scholars from across the globe who examine the basic concepts and key issues of ecomedia studies. The concepts of "frames," "flow", and "convergence" structure a dynamic collection divided into three parts. The first part addresses traditional visual texts, such as comics, photography, and film. The second part of the book addresses traditional broadcast media, such as radio, and television, and the third part looks at new media, such as advertising, video games, the internet, and digital renderings of scientific data. In its breadth and scope, Ecomedia: Key Issues presents a unique
